## **Understanding Middle School Math** Arthur A. Hyde,Cheryl Heck,Susan Friedlander,Lynn Pittner,2009 Imagine handling students state by state data on the number of gallons of soft

drinks sold per person in one year Imagine using it to lead a vibrant problem solving session in which students energetically pose and answer mathematical questions Why does it say sold instead of consumed What is a soft drink Is it the same as a soda Who would collect this kind of data Why would they collect it How was gallons per person calculated What was the total amount of soda sold in our state How many 12 ounce cans is that 20 ounce bottles How many of each per person Understanding Middle School Math gathers 50 cool problems like this that lead to deep thinking Problems such as the Renovation Problem in which students uncover ideas about how perimeter area length and cost affect a construction project Or Chocolate Algebra where they discover linear relationships among the pocket money available to buy two differently priced chocolate candies Arthur Hyde combines the latest research and decades of classroom experience to braid language cognition and math His approach can help any student including underprepared ones with the rigors of math in middle school and beyond He has created and adapted problems that strongly connect math to the real world to students lives and to prior knowledge Problems that scaffold content and processes and give students multiple entry points into learning Every problem has been extensively field tested and refined by classroom teachers And for each cool problem practicing middle school teachers describe how they used it to differentiate over a wide range of students and extend learning For fantastic problems your students won t soon forget and teaching solutions that are exciting substantial and transformative turn to Art Hyde Read and use Understanding Middle School Math and pass your love of math on as you meet your classroom goals
