The Arctic ,1974 **The Arctic** Fred Bruemmer,1974 An Annotated Bibliography of Inuit Art Richard C.

Crandall,Susan M. Crandall,2015-07-25 Archaeological digs have turned up sculptures in Inuit lands that are thousands of years old but Inuit art as it is known today only dates back to the beginning of the 1900s Early art was traditionally produced from soft materials such as whalebone and tools and objects were also fashioned out of stone bone and ivory because these materials were readily available The Inuit people are known not just for their sculpture but for their graphic art as well the most prominent forms being lithographs and stonecuts This work affords easy access to information to those interested in any type of Inuit art There are annotated entries on over 3 761 articles books catalogues government documents and other publications

Edwards, Sigrid Lien, 2016-02-17 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe
