Officer Department of Defense Department of the Army Upon being commissioned in the Armed Services of the United States a man incurs a lasting obligation to cherish and protect his country and to develop within himself that capacity and reserve strength which will enable him to serve its arms and the welfare of his fellow Americans with increasing wisdom diligence and patriotic conviction This is the meaning of his commission It is not modified by any reason of assignment while in the service nor is the obligation lessened on the day an officer puts the uniform aside and returns to civil life Having been specially chosen by the United States to sustain the dignity and integrity of its sovereign power an officer is expected so to maintain himself and so to exert his influence for so long as he may live that he will be recognized as a worthy symbol of all that is best in the national character In this sense the trust imposed in the highest military commander in the land is not more than what is encharged the newest ensign or second lieutenant Nor is it less It is the fact of commission which gives special distinction to the man and in turn requires that the measure of his devotion to the service of his country be distinctive as compared with the charge laid upon the average citizen

**The Armed Forces Officer** National Defense National Defense University Press,2020-05-22 The Armed Forces Officer 2007 Edition Original National Defense University publication In 1950 the great Soldier Statesman George C Marshall then serving as the Secretary of Defense signed a cover page for a new book titled The Armed Forces Officer That original version of this book was written by none other than S L A Marshall who later explained that Secretary Marshall had inspired the undertaking due to his personal conviction that American military officers of whatever service should share common ground ethically and morally Written at the dawn of the nuclear age and the emergence of the Cold War it addressed an officer corps tasked with developing a strategy of nuclear deterrence facing unprecedeted deployments and adapting to the creation of the Department of Defense and other new organizations necessary to manage the threats of a new global order Now in the

second decade of the 21st century our nation is again confronted with a volatile and complex security environment and addressing the challenges of our time will place new demands on military leaders at all levels We in the Profession of Arms will continue to adapt our training and education programs as we have always done to provide our officers with the intellectual and practical tools necessary to succeed in this unpredictable and unstable world The character of warfare may change over time but its nature does not As novel as much of the current security environment may seem George C Marshall's wisdom still rings true today Regardless of the challenges we face our leaders especially our officers must share a moral foundation and practice a common professional ethic Our tactics techniques and practices may change but our bedrock principles remain the same This new edition of The Armed Forces Officer articulates the ethical and moral underpinnings at the core of our profession The special trust and confidence placed in us by the Nation we protect is built upon this foundation I commend members of our officer corps to embrace the principles of this important book and practice them daily in the performance of your duties More importantly I expect you to imbue these values in the next generation of leaders The Armed Forces Officer United States.
