**Investment in the Philippines** United States. Bureau of Foreign Commerce, 1955 *The American Colonial State in the Philippines* Julian Go, Anne L. Foster, 2003-07-08 Interdisciplinary collection placing the U S imperial project in the Philippines within a global comparative framework *The Philippines* Keith Lightfoot, 1973 *Official Gazette - Republic of the Philippines* Philippines, 1969

**Interrelations between Public Policies, Migration and Development in the Philippines** Collectif, 2017-05-30 Interrelations between Public Policies Migration and Development in the Philippines is the result of a project carried out by the Scalabrini Migration Center SMC and the OECD Development Centre in collaboration with the Commission on Filipinos Overseas CFO and with support from the European Union The project aimed to provide policy makers with evidence on the way migration influences specific sectors the labour market agriculture education and investment and financial services and in turn how sectoral policies affect migration The report addresses three dimensions of the migration cycle that have become an important part of the country s social and economic contexts emigration remittances and return The results of the empirical work confirm that even though migration contributes to the development of the Philippines the potential of migration is not fully exploited One explanation is that despite its advancement in understanding the link between migration and development which is reflected in the Philippine Development Plan not all policy makers in the Philippines take migration sufficiently into account in their respective policy areas The Philippines therefore needs to adopt a more coherent policy agenda and better integrate migration into their sectoral strategies to enhance the contribution of migration to development in the country

Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in the Philippines deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in the Philippines will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law      *The Story of the Philippines* Murat
