LaFollette, 2023-04-28 False data published by a psychologist influence policies for treating the mentally retarded A Nobel Prize winning molecular biologist resigns the presidency of Rockefeller University in the wake of a scandal involving a co author accused of fabricating data A university investigating committee declares that almost half the published articles of a promising young radiologist are fraudulent Incidents like these strike at the heart of the scientific enterprise and shake the confidence of a society accustomed to thinking of scientists as selfless seekers of truth Marcel LaFollette's long awaited book gives a penetrating examination of the world of scientific publishing in which such incidents of misconduct take place Because influential scientific journals have been involved in the controversies LaFollette focuses on the fragile peer review process the editorial system of seeking pre publication opinions from experts She addresses the cultural glorification of science which combined with a scientist's thirst for achievement can seem to make cheating worth the danger She describes the great risks taken by the accusers often scholars of less prestige and power than the accused whom she calls nemesis figures for their relentless dedication to uncovering dishonesty In sober warning LaFollette notes that impatient calls from Congress journalists and taxpayers for greater accountability from scientists have important implications for the entire system of scientific research and communication Provocative and learned *Stealing Into Print* is certain to become the authoritative work on scientific fraud invaluable to the scientific community policy makers and the general public This title is part of UC Press's Voices Revived program which commemorates University of California

Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1993 False data published by a psychologist influence policies for treating the mentally retarded A Nobel Prize winning molecular biologist resigns the presidency of Rockefeller University in the wake of a scandal involving a co author accused of fabricating

Bones of Contention Marvin L. Lubenow, 2004-10 While evolutionists point to every new discovery of humanlike fossils as further evidence to support the theory that people evolved from apelike creatures Marvin L Lubenow contends that the fossils do more to disprove evolutionary theory than otherwise In *Bones of Contention* Lubenow offers readers of all backgrounds a readable argument for the creationist view of the origins of humankind that addresses all angles of the issue In this new edition Lubenow has thoroughly updated and revised his original material to reflect a dozen years of evolutionist theory and modern paleoanthropology Scholars and laypeople alike will find solid answers grounded in research to all of their tough questions

Piltdown Man Miles Russell, 2003 The human and animal remains discovered almost 100 years ago at Piltdown near Lewes in Sussex were at the time hailed as the missing link between ape and man It was not until 1953 that modern analysis conclusively revealed an ingenious hoax The perpetrator was almost certainly the antiquarian excavator Charles Dawson who as Miles Russell shows was responsible for 16 other archaeological forgeries during his lifetime

Piltdown Frank Spencer, Ian Langham, 1990 On the night of December 18 1912 a packed meeting of the Geological Society of London listened to Charles Dawson a rural lawyer and an amateur geologist make an exciting announcement he had found evolution's missing link in an old gravel pit near Piltdown Common Together with Arthur Smith Woodward Keeper of Geology at the British Museum and a noted authority on prehistoric archaeology Dawson had discovered the shattered remnants of a thick human like skull together with a simian jaw the fossils of a strange creature halfway between apes and human beings Though debates raged over reconstructing Piltdown Man from these remains few doubted their authenticity and it was not until forty years later that further tests proved they were an elaborate fake Written by anthropologist Frank Spencer Piltdown tells the story of this incredible hoax the greatest forgery in the history of modern science Spencer begins by taking us back to the debates in Edwardian Britain over the antiquity of *Homo sapiens* and the public excitement over the search for the missing link between apes and human beings He recounts Dawson's initial discovery of the shattered skull the further dramatic finds made with Woodward in the midst of the furious scientific debate over Piltdown Man and the great public argument between Woodward and Arthur Keith over the reconstruction of the head Keith an anatomist and Conservator of the Hunterian Museum of the Royal College of Surgeons won fame by promoting his own theory of a very human like version of the Piltdown skull Spencer also traces the increasing confusion and doubt over Piltdown Man as later archaeological discoveries were made in Africa and China the Piltdown Man didn't seem to fit the emerging picture of human evolution and an ever larger number of scientists claimed

that the jaw did not belong with the skull Finally he captures the dramatic uncovering of the hoax closely following anthropologist Joseph Weiner s fascinating investigation in 1953 Weiner troubled by the inconsistencies of Piltdown Man revealed that the remains consisted of a modern human skull and the jaw of an orangutan treated with chemicals to simulate great age and planted at the Piltdown site Yet the question of who perpetrated the forgery has remained to the present day Certainly Dawson a rural solicitor who craved a great scientific reputation was intimately involved But who provided the tremendous expertise behind the hoax and why would such a learned authority risk his career on a highly public fake Was it Woodward the great archaeologist most closely associated with the find Keith the prominent anatomist Or was it Teilhard de Chardin the French priest who found a critical tooth at the site Spencer draws on original documents from the archives of the British Museum and other sources to identify the missing conspirator in a startling and convincing revelation Compelling and authoritative Piltdown offers a gripping account of this great hoax and the final word on one of the deepest mysteries of modern science

Unraveling Piltdown John Evangelist Walsh,1996 In 1913 amateur fossil hunter and archaeologist Charles Dawson found in a gravel pit the cranium and jaw of an entirely new species of humanoid which became known as Piltdown man which caused headlines worldwide as the missing link between man and ape In 1952 it was exposed as a hoax With eight pages of photos this book is a wonderful detective story and the first examination the convincingly fingers the perpetrator
