## **The Political Economy Of Defense Contracting:**

**The Political Economy of Defense Contracting** Kenneth R. Mayer, 1991-01-01 Many people suspect that politics drives American defence spending. They feel that Congressional decisions about which weapons systems should be supported and Pentagon decisions about which companies should build them are made on political considerations of local economic impact and that Congress looks to the defence budget as a huge pork barrel project. In this book Kenneth R Mayer draws on previously unavailable data on recent defence subcontract distributions down to individual congressional districts to test the link between politics and defence contracting. He concludes that the accepted beliefs are oversimplified and mostly wrong.

**The Political Economy of Military Spending in the United States** Alex Mintz, 2002-01-31 This is a timely collection of essays utilizing the political economy approach to military spending primarily by the United States. The articles deal specifically with the relationships between defense spending and a political business cycles, public opinion and the US-Soviet relationship, b) military action i.e. war, c) economic performance, the trade deficit, guns versus butter issues and fiscal policy.

**The Political Economy Of National Defense** William J. Weida, Franklin L. Gertcher, 2019-07-11 This timely and wide ranging study covers both the economic and the political aspects of defense spending first by providing a theoretical framework and then by explaining in a political economy context the results of decisions to allocate scarce resources to defense. In doing so the authors provide a comprehensive picture of the interaction between defense spending and the economic and political structure of the United States complementing their exploration of topical concerns such as SDI with analysis of long term trends and issues of timeless importance in the defense debate. Because of the politicizing of defense planning and procurement there have been few significant applications of optimization techniques to high level defense issues over the past decade. As a result there has been a rapid decline in the importance of those techniques historically the focus of books on defense economics. Like its predecessors this book presents optimization techniques applicable to a wide variety of defense problems but it also illustrates what happens in actual practice and why defense decisions are often not economically efficient. The authors discuss alternatives for cases when political constraints make efficient solutions unlikely and explore changes in the defense establishment and political structures that would make economically efficient resource allocations a reality.

*The Politics of Defense Contracting* Gordon Adams, 2020-02-18 This is the first systematic study of the relationship between government and defense contractors examining in detail the political impact of the eight most powerful defense contractors. It details ways in which Boeing, General Dynamics, Grumman, McDonnell Douglas, Northrop, Rockwell International and United Technologies influence government from their basic contract activity, corporate structure and research efforts to their Washington offices. Political Action Committee campaign contributions, hiring of government personnel and membership on federal advisory committees. Adams concludes with specific recommendations for changes in disclosure requirements that would curb some of the political power corporations can wield. It also suggests specific ways in
