The Political Economy Of British Regional Policy:

The Political Economy of British Regional Policy D. W. Parsons, 1988 **Regional Policy for Ever** Graham Hallett, Peter J. Randall, E. G. West, 1973 **Regional Policy in a Changing World** Niles Hansen, Benjamin Higgins, Donald J. Savoie, 2013-06-29 **Regional Development Theories and Their Application** Benjamin Higgins, 2017-07-12

Throughout the world today former nation states as disparate as Yugoslavia Somalia and Canada have either disintegrated or threaten to splinter into regions The conflicts are economic social ethnic linguistic religious political and cultural Higgins and Savoie analyze the reasons for these conflicts and show why attempts to eliminate regional disparities within nations have been largely unsuccessful This volume is a highly readable comprehensive survey of the literature and current debates in the fields of regional economics development policy and planning *Spatial Policy in a Divided Nation* Richard T. Harrison, Mark Hart, 2002-09 This re evaluation of the role of regional policy in the UK has been accompanied by a much closer identification of regional policy with national economic policymaking This book drawing upon the contributions of a large number of experts in the field in the UK sets the debate on the future of spatial policy explicitly within the context of the economics and politics of the North South divide Recent policy debates in the United Kingdom have highlighted two major issues which will shape future policy developments and their impact in the 1990s the persistence of pronounced regional economic and social imbalances and the shift away from traditional perceptions of the role of regional policy with a new emphasis on inner city as opposed to regional problems In this collection by leading researchers in the field the role of regional policy in the UK is re evaluated against a background of renewed debate on the economic disparities inherent in the north south divide and an assessment of the implications for future policy British Regional Development Since World War I Christopher M. Law, 2021-08-14 First published in 1981 *British Regional Development Since World War I* presents a comprehensive and balanced introduction to the problems of regional development in Britain Since World War I it has been possible to talk of Britain as two nations a prosperous South including the Midlands and a poor North Christopher Law examines the nature and causes of this division including impact of industrial structure London's role as capital in the spatial economy and the influence of better environments on development This valuable study will be an essential read for anyone interested in any aspect of regional development and development studies in the last ninety years **The Renaissance of the Scottish Economy?** Charlotte Lythe, Madhavi Majmudar, 2021-10-12 Originally published in 1982 written at a time when Scotland was emerging from a recession it offered a comprehensive appraisal of the Scottish economy The book shows that long term regional problems had not gone away and that the presence of North Sea oil was not a guarantee of future economic health in Scotland A major theme of the work is the key role of government expenditure in the then recent restructuring of the Scottish economy Many of the issues discussed remain pertinent today as Scotland once again discusses the future shape of its economy and political identity *British Planning* J. B. Cullingworth, 1999 Where is Planning at the

millennium The post war Planning acts heralded a new era in which land use became subject to comprehensive control Fifty years later this system is largely intact Major questions are now being asked concerning the adequacy of this system for a society which has witnessed major social economic and political change British Planning brings together the country's leading analysts of planning and its policy to present a state of the art review and analysis British Planning will prove invaluable to students researchers and professionals in planning and Social Policy

Regional Policy in a Changing World Niles Hansen, Benjamin Higgins, Donald J. Savoie, 1990-01-31 Inspired by the realization that in most countries the commitment to regional development is determined by national ideological swings rather than the socio economic conditions in a particular region here meaning an area smaller than a country Surveys and evaluates the history of regional policy by the national governments of Canada France Great Britain the US Australia Malaysia and Brazil Annotation copyrighted by Book News Inc Portland OR

Governing Local and Regional Economies Andrew Wood, David Valler, 2004 Over the past decade the study of cities and regions has been marked by an increased concern with institutions and their relationship to economic and political change This institutional turn has been particularly prominent in studies of local and regional economic governance This book brings together internationally renowned authors from a variety of disciplinary backgrounds to take critical stock of the field assess the merits and limits of the institutional turn and examine directions for future work Drawing together a range of theoretical and empirical contributions the book seeks to move forward the debate on institutions and their relationship to local and regional governance The individual chapters examine the theoretical underpinnings of institutionalist work the critical relationship between institutions collaboration and local and regional economic performance as well as questions of local and regional economic governance and its politics

Japanese Multinationals in the Changing Context of Regional Policy Man-Hee Han, 1994 This study aims to connect the changes in the geography of selected countries with the movement of international market forces and the changing world economy The author explores the worldwide managerial strategy of Japanese multinational companies through their location decisions

References statistical tables *Urban and Regional Policy* Jon Pierre,1995 This volume provides the most important essays and papers on urban and regional policy making it a convenient summary of the key theories approaches and research results The study of sub national politics is no longer mainly concerned with the urban political decision making process and now focuses on the political economic and social preconditions for urban policy As the articles and papers reprinted in this volume demonstrate local and regional politics are increasingly important features of most Western democracies Economic and political life are more and more determined by changes occurring at the local regional and global levels rather than at the national level This volume seeks to cover the most important elements of research on local government with a particular emphasis on different approaches and theories of urban political economy The volume covers in turn the study of urban politics and government theories of local government central local relationships and local autonomy local politics the political economy of local government and regional policy *The Political-Economy of Blair's 'New Regional Policy'* John Harrison,2013 The region and regional change have been elusive ideas within political and economic geography and in essence require a greater understanding of their dynamic characteristics Trailing in the backwaters of the devolution to the Celtic nations of Britain the contemporary era of New Labour s political economic ideology manifest through third way governance in England places the region and its functional capacity into the heart of geographical inquiry Drawing upon a new regionalist epistemology this paper seeks to recover a sense of regional political economy through a critical investigation of the development and formulation of Blair s New Regional Policy NRP I address how New Labour has attempted to marry economic regionalisation on the one hand and democratic regionalism on the other This paper specifically questions the wisdom of such a marriage of politically distinct ideologies through a critical investigation of the underlying contradictions of their strategy from both a theoretical and empirical standpoint Demonstrated both in the North East no vote in 2004 and in the post mortem undertaken by the ODPM Select Committee in 2005 the paper illustrates how a loss of political drive gradually undermined the capacity of devolution to deliver in England Finally I argue that through the lens of the NRP we can speculate on some of the wider issues and implications for the study of regional governance
