### **The Political Economy and Media Coverage of the European Economic Crisis** Julien Mercille, 2014-08-27

The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why using a critical political economic perspective and focusing on the case of Ireland. Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

Allen, 2004 This important and timely two volume collection presents the key issues and processes that surround recent large scale financial crises in Asia, Latin America and elsewhere and identifies procedures that will help to avoid and manage crises. The articles are drawn from leading journals in political economy, international relations, political science and economics. The reconstruction of the international financial architecture is identified as a working compromise which brings together neo Keynesian and neo liberal principles but which in itself cannot fully answer the challenges of systemic risk. Globalization processes contribute to systemic risk and complicate the efforts of the IMF and
