*Establishing Democracies* Mary Ellen Fischer, 2021-01-07 Balancing historical and contemporary cases this comparative text examines the crucial question of what promotes or prevents the successful founding of democratic systems. The country case studies are placed in context by a substantial introduction surveying theories of democracy and democratic transition and by a conclusion assessing the cases and suggesting common patterns in the establishment of successful democracies. Balancing historical and contemporary cases this comparative text examines the crucial question of what promotes or prevents the successful founding of democratic systems. Underscoring lessons learned from successful regime change and assessing current efforts to establish democracies whose ultimate fate is yet uncertain this book will enable students to evaluate the chances of success for societies making the transition from an authoritarian or communist regime. The case studies are placed in context by a substantial introduction surveying theories of democracy and democratic transition and a conclusion comparing the cases and suggesting common patterns in the establishment of successful democracies. Created for upper level students this book can be used as a primary text to be supplemented by theoretical readings or as a source of additional case studies. Extensive notes provide a wealth of suggestions for further reading and research.

*Eastern European Railways in Transition* Mr Henry Jacolin, Prof Dr Ralf

Roth,2013-10-28 During the nineteenth century railway lines spread rapidly across Europe linking the continent in ways unimaginable to previous generations By the beginning of the twentieth century the great cities of the continent were linked by a complex and extensive rail network Yet this high point of interconnectivity was abruptly cut off after 1945 as the Cold War built barriers both physical and ideological between east and west In this volume leading transport history scholars take a fresh look at this situation and the ramifications it had for Europe As well as addressing the parallel development of railways either side of the Iron Curtain the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe In particular it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer both nationally and internationally Including contributions from historians researchers policy makers representatives of railway companies and railway museum staff the essays in this collection touch upon a rich range of subjects Divided into four sections The Historical Overview Under Russian Protection After the Fall of the Iron Curtain and The Heritage of Railways in Eastern Europe the volume offers a broadly chronological introduction to the issue that provides both a snap shot of current debates and a starting point for further research It concludes that in an era of increased globalisation and interconnectivity and despite the rise of air and road transport and virtual methods of communication railways still have a crucial role to play in the development of a prosperous and connected Europe

**Post-socialist Romanian Economy** Ioan D. Adumităcesei,Niculae Niculescu,Al Pascu,1999

**Diverse Paths to Modernity in Southeastern Europe** Gerasimo Augustinos,1991 As the nations in Southeastern Europe confront the changes that are

sweeping across the continent there is much talk of a new beginning for the countries. But just as surely as they face the enormous task of restructuring their future development will certainly be influenced to a large extent by their particular experiences in the past. This collection of essays considers the problems and prospects of development from a historical perspective by examining the major Balkan states Yugoslavia, Romania, Greece and Bulgaria. These strategic countries are an excellent example of societies with the potential for significant economic growth but which have developed unevenly because of external and domestic factors. This work provides an integrated overview geographically and temporally of each nation's development, reaching back to its emergence. In his introduction editor Gerasimos Augustinos characterizes development as the process by which economic and technological change leads to the transformation of the institutions and values of a society. Each contributor then examines each country and its specific historical determinants identifying the developmental strategies that have been attempted in each state and allowing for the comparison of variations. Essay one focuses on Bulgarian modernization discussing the possibilities and limits of political and economic development through secularization. The problems of differentiated modernization form the basis of the second essay which compares the seemingly dissimilar states of Bulgaria and Yugoslavia in the first half of the twentieth century. Essay three addresses the socialist self-management strategy that Yugoslavia adopted in an attempt to promote progress and regime legitimacy. The development of Greece through the market and entrepreneurship is the subject of the fourth essay while Romania's rapid shift from agriculture to industrialization serves as the focus of the final essay. This comparative study will be an important reference work for courses in contemporary political systems, economic development and European history as well as a significant addition to public college and university libraries.

**and Post-Communist Europe** Egbert Jahn, 2008 The breakdown of the Communist party rule was accompanied by an unexpected renaissance of nationalism and secessionism. Of the nine Communist states only five nation states have survived. Whereas the German Democratic Republic became unified with the Federal Republic of Germany, the three multinational states dissolved into 16 hybrid ethno-national states and two states of federated nations. The latter remain imperiled in their territorial integrity. In all countries state and ethnic nationalism combine in peculiar ways which leaves room for sub-national stateness and various other forms of ethnic and national heterogeneity. In this volume experts describe the unfolding of nationalism in each of the post-Communist states during the period of upheaval from 1985 to 1995. First the relationship of the titular ethnic group with its own ethnic nationalism is discussed as well as the nationalism that refers to the whole state.

including the minorities This relationship influences the way the states treat the minorities which often aim for sub stateness or at least for representation through a political party organization
