The Political Landscape Constellations Of Authority In Early Complex Polities:

The Political Landscape Adam T Smith, 2003-10-07 This highly original and challenging book defies every easy form of classification. Ostensibly about early polities, its penetrating and erudite asides extend with equal facility into contemporary politics and the symmetrical deficiencies of modernism and postmodernism. To my knowledge, imaginative reflections of spatial representations have never previously found their way into the theoretical base of what has been thought of as an essentially materialistic archaeological science. It is a pleasure and a discovery to see the permanent and rightful place Adam Smith has now fashioned for them. Robert McC Adams, Secretary Emeritus, The Smithsonian Institution. If social theory in cultural anthropology was transformed in the last decades by a linguistic turn, research by archaeologists into the development and practices of early states now seems to be undergoing a geographic turn. Adam Smith's book, although drawing from modern currents in geography, anthropology, sociology, and political philosophy, brings original archaeological contributions to social theory by examining the making and re-making of landscapes in early complex polities, especially in Mesopotamian, Urartian, and Maya states. Smith observes these and other early states as political landscapes in which monuments come to constitute authority and shape memories. Smith's book represents a comprehensive turn from metahistorical reifications of the state to investigations of how the content of social roles was determined through the production of landscapes. The landscape of archaeology will be changed decisively by this book. Norman Yoffee, Professor, Dept of Near Eastern Studies and Dept of Anthropology, University of Michigan. This book emerges as both a remarkable scholarly achievement and something of a manifesto for contemporary political thinking and engagement. Susan E Alcock, author of *Archaeologies of the Greek Past: Landscape, Monuments, and Memories*. **Political Landscapes of Capital Cities**

Jessica Joyce Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 *Political Landscapes of Capital Cities* investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors, including archaeologists, anthropologists, and art historians, uses the methodology put forth in Adam T Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. *Political Landscapes of Capital Cities* blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis hinging on the methodological tools of not only architectural and urban design but also cultural historiographical and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal

ideals in the spaces of their capitals ultimately confirming that political authority is profoundly spatial Contributors Jelena Bogdanovi Jessica Joyce Christie Talinn Grigor Eulogio Guzm n Gregor Kalas Stephanie Pilat Melody Rod ari Anne Toxey Alexei Vranich

The Political Machine Adam T. Smith, 2020-08-04 The Political Machine investigates the essential role that material culture plays in the practices and maintenance of political sovereignty Through an archaeological exploration of the Bronze Age Caucasus Adam Smith demonstrates that beyond assemblies of people polities are just as importantly assemblages of things from ballots and bullets to crowns regalia and licenses Smith looks at the ways that these assemblages help to forge cohesive publics separate sovereigns from a wider social mass and formalize governance and he considers how these developments continue to shape politics today Smith shows that the formation of polities is as much about the process of manufacturing assemblages as it is about disciplining subjects and that these material objects or machines sustain communities orders and institutions The sensibilities senses and sentiments connecting people to things enabled political authority during the Bronze Age and fortify political power even in the contemporary world Smith provides a detailed account of the transformation of communities in the Caucasus from small scale early Bronze Age villages committed to egalitarianism to Late Bronze Age polities predicated on radical inequality organized violence and a centralized apparatus of rule From Bronze Age traditions of mortuary ritual and divination to current controversies over flag pins and Predator drones The Political Machine sheds new light on how material goods authorize and defend political order

A Commonwealth of the People David Rollison, 2010-01-21 In 1500 fewer than three million people spoke English today English speakers number at least a billion worldwide This book asks how and why a small island people became the nucleus of an empire on which the sun never set David Rollison argues that the English explosion was the outcome of a long social revolution with roots deep in the medieval past A succession of crises from the Norman Conquest to the English Revolution were causal links and chains of collective memory in a unique vernacular populist movement The keyword of this long revolution commonwealth has been largely invisible in traditional constitutional history This panoramic synthesis of political intellectual social cultural religious economic literary and linguistic movements offers a new constitutional history in which state institutions and power elites were subordinate and answerable to a greater community that the early modern English called commonwealth and we call society

The Ancient City Joyce Marcus, Jeremy A. Sabloff, 2008-10-15 Ancient cities have much to tell us about the social political religious and economic conditions of their times and also about our own Ongoing excavations all over the world are enabling scholars to

document intra city changes through time city to city interaction and changing relations between cities and their hinterlands As the essays in this volume reveal archaeologists now know much more about the founding and functions of ancient cities their diverse trade networks their heterogeneous plans and layouts and their various lifespans and trajectories Jacket

Social Orders and Social Landscapes Laura M. Popova, Charles W. Hartley, Adam T. Smith, 2007 Social Orders and Social Landscapes marks a new direction in research for Eurasian archaeology that focuses on how people lived in their local environment and interacted with their near and distant neighbours rather than on overarching comparisons of archaeological culture complexes Stemming from the 2005 University of Chicago Eurasian Archaeology Conference the papers collected here reflect this new research agenda though the way in which each author addressed the theme of the conference and thus the book was strikingly varied This diversity arises out of the field TM s intellectual flux driven by the principled engagement of the rich analytical traditions of the Soviet CIS Anglo American and European schools Despite the variability in approaches and subject matter several key themes emerged 1 the reinterpretation culture categories by examining particular aspects of social life 2 the role social memory plays in the production of landscape and place 3 the influence of the built environment on societies and 4 the ways in which economic considerations affect social orders and landscapes The result is a book that helps to re image Eurasia as a complex landscape fragmented by historically contingent and shifting ecological and social boundaries rather than a bounded mosaic of culture areas or environmental zones

Scholarly research on Eurasia was transformed by the collapse of the Soviet Union in 1991 Entire areas and fields of research became accessible to European and American scholars for the first time resulting in the emergence of new centers specializing in primary field investigations throughout the vast politically transformed landmass of Eurasia One such center is the University of Chicago that has recently sponsored two large international conferences on Eurasian archaeology Social Orders and Social Landscapes is the product of the second Chicago conference held in spring 2005 The editors of the volume should be proud of their efforts that have resulted in such a broad ranging and prompt publication The articles encompass a variety of disciplinary perspectives including archaeology history art history palynology and zooarchaeology extend chronologically from Neolithic and Bronze Age times to the formation of national identity in Turkey in the early 20th century and range geographically from Europe to China Several articles reconstruct basic

subsistence activities others analyze distinctive settlement types and political and cultural frontiers including the assimilation and emergence of new self defined ethnic groups and the selective adoption of new systems of religious belief What unites this diverse collection is their consistent emphasis on the social construction of reality and the production of social landscapes and memories that altered perceptions of the physical world and mediated the practical activities that here have been convincingly reconstructed from the archaeological record In so doing rigid stereotypes are questioned and novel interpretations persuasively advanced Early Bronze Age pastoralism on the south Russian steppes did not consist exclusively of herding animals nor was it combined as it was later in the Iron Age with the pursuit of agriculture rather D Anthony and D Brown suggest that at least in the Samara river valley the herding of animals occurred along side the intensive gathering of wild nutritionally rich plants The kalas of ancient Chorasmia are not cities nor even proto urban formations but rather are large heavily fortified enclosures meant to repel attacks of armed nomadic cavalry They represent a continuation of a distinct Central Asian settlement pattern that began in the Bronze Age and that formed the center of a landscape divided into contiguous self contained oases The Mongols not only herded livestock but also farmed fished hunted and traded throughout the vast area that they had conquered uniting most of Eurasia into a single economically integrated system New perspectives proliferate throughout this richly detailed and extremely broad ranging collected volume Phil Kohl Professor of Anthropology and the Kathryn W Davis Professor of Slavic Studies at Wellesley College oe oeSocial Orders and Social Landscapes is a stimulating addition to the still small literature in English making the rich datasets from the archaeology of Eurasia widely accessible to Western scholars The authors of the eighteen chapters analyze data from China to the Mediterranean from the fourth millennium BCE through the fourteenth century CE with the tools of art and architectural history text analysis paleobotany and paleozoology and anthropological theory among others The product of a conference at the University of Chicago this book fulfils the goal of the graduate student organizers to apply interdisciplinary approaches to understanding the archaeology and history of the Eurasian landmass in local terms through a focus on oehow people lived in their local environments In the decade and a half since the end of the Soviet Union scholarly communication has broadened and the mutual influences have stimulated many new and thought provoking views on the Eurasian past This book is an exemplary product of the new scholarly discourse Karen S Robinson Research Scholar Department of Anthropology Barnard College Columbia University Ancient Complexities Susan M. 2005 of Brill's bi-annual Ancient West East **The Classic Maya Western Region** Peter Biro, 2011 Over the past decade there has been substantial progress in understanding Maya hieroglyphic writing This development led to the reconstruction of Classic Maya AD 300-900 political history Epigraphers suggested a major influence of Teotihuacan during the Early Classic Period AD 300-600 and some even argued for a direct Teotihuacan conquest of the Maya lowlands The Late Classic Period AD 600-900 was interpreted as a constant hegemonic struggle between Tikal and Calakmul which in different ways influenced Classic Maya political relations These reconstructions of political history were directly tied to the interpretations of political organisation ranging from peer polity interaction models to more bureaucratic polities In this work the author examines and analyses inscriptions from the Western Maya Region which are especially rich in information concerning interaction of polities and interpolity organisation The author reconstructs the historical development of the region examining the influence of Teotihuacan and that of the hegemonic states Tikal and Calakmul Publisher's website **Rural Settlement and Elite Representation** Jane Elizabeth Rempel, 2004
