and the Art of Time reveals how one of the world s greatest writers of short stories challenged and reconfigured traditional assumptions about time In chapters that analyze selected stories and collections from across Munro s career Laura K Davis examines the formal and conceptual function of temporality in Munro s oeuvre considering the relationship between the past and the present material experiences of being story structure memory and memoir Clear and compelling interpretations of Munro s stories offer insights into her writing process her representations of character and setting and the complexities of her narrative techniques which often evade linearity and chronology emphasizing instead revision repetition and the body By highlighting the connections between time and various tropes in Munro s stories including identity ephemerality and environmental change this study provides new exciting avenues for engaging with Munro s work

embarking seek gladdening news of the good life to come **Time Travels** Elizabeth Grosz,2005-06-22 Recently the distinguished feminist theorist Elizabeth Grosz has turned her critical acumen toward rethinking time and duration Time Travels brings her trailblazing essays together to show how reconceptualizing temporality transforms and revitalizes key scholarly and political projects In these essays Grosz demonstrates how imagining different relations between the past

present and future alters understandings of social and scientific projects ranging from theories of justice to evolutionary biology and she explores the radical implications of the reordering of these projects for feminist queer and critical race theories Grosz's reflections on how rethinking time might generate new understandings of nature culture subjectivity and politics are wide ranging. She moves from a compelling argument that Charles Darwin's notion of biological and cultural evolution can potentially benefit feminist queer and antiracist agendas to an exploration of modern jurisprudence's reliance on the notion that justice is only immanent in the future and thus is always beyond reach. She examines Henri Bergson's philosophy of duration in light of the writings of Gilles Deleuze, Maurice Merleau-Ponty, and William James, and she discusses issues of sexual difference, identity, pleasure, and desire in relation to the thought of Deleuze, Friedrich Nietzsche, Michel Foucault, and Luce Irigaray. Together these essays demonstrate the broad scope and applicability of Grosz's thinking about time as an undertheorized but uniquely productive force.
