The Political Structure Of African States:

The Political Structure of African States Kwasi Sarfo, 1988 **Politics and Government in African States** Peter Duignan, Robert H. Jackson, 2022-08-01 Originally published in 1986 Politics and Government in African States 1960 1985 deals with the politics of sub Saharan African states since independence Each chapter considers the formal structure of government at the time of independence and traces the subsequent changes Each chapter also describes the development of the state machinery the civil service the parastatals defence and police forces party structure the political opposition and trade unions The economics of African states are dealt with insofar as they affect politics and government **Africa: the Political Pattern** Millar MacLure, Douglas George Anglin, 1961 **African Political Systems** Meyer Fortes, 2011-03-23

One object we had in initiating this study was to provide a convenient reference book for anthropologists We also hope that it will be a contribution to the discipline of comparative politics We feel sure that the first object has been attained for the societies described are representative of common types of African political systems and taken together they enable a student to appreciate the great variety of such types As the sketch map on p 2 shows the eight systems described are widely distributed in the continent Most of the forms described are variants of a pattern of political organization found among contiguous or neighbouring societies so that this book covers by implication a very large part of Africa We are aware that not every type of political system found in Africa is represented but we believe that all the major principles of African political organization are brought out in these essays Several contributors have described the changes in the political systems they investigated which have taken place as a result of European conquest and rule If we do not emphasize this side of the subject it is because all contributors are more interested in anthropological than in administrative problems We do not wish to imply however that anthropology is indifferent to practical affairs The policy of Indirect Rule is now generally accepted in British Africa We would suggest that it can only prove advantageous in the long run if the principles of African political systems such as this book deals with are understood Each essay is a condensation of a detailed study of the political system of a single people undertaken in recent years by the most advanced methods of field work by students trained in anthropological theory A degree of brevity that hardly does justice to some important topics has been necessary for reasons of space Each essay furnishes nevertheless a useful standard by which the political systems of other peoples in the same area may be classified No such classification is attempted in this book but we recognize that a satisfactory comparative study of African political institutions can only be undertaken after a classification of the kind has been made It would then be possible to study a whole range of adjacent societies in the light of the Ngwato system the Tale system the Ankole system the Bemba system and so on and by analysis to state the chief characters of series of political systems found in large areas An analysis of the results obtained by these comparative studies in fields where a whole range of societies display many similar characteristics in their political systems would be more likely to lead to valid scientific generalizations than comparison between particular societies

Since independence the political institutions of many African states have undergone a process of consolidation and subsequent deterioration. Constrained by external economic dependency and an acute scarcity of economic and technical resources, state officials have demonstrated a diminished capacity to regulate their societies. Public policies are agreed upon but ineffectively implemented by the weak institutions of the state. Although scholars have analyzed the various facets of state building in detail, little systematic attention has been given to the issue of the decline of the state and mechanisms to cope with state ineffectiveness in Africa. This book focuses especially on the character of the postcolonial state in Africa, the nature of and reasons for state deterioration, and the mechanisms and policies for coping with state malfunction. Scholars from Africa, the United States, Europe, and the Middle East combine a broad understanding of African political processes with expertise on specific regions. Their analytic and comparative perspective provides a comprehensive and timely treatment of this vital and heretofore neglected theme in African politics.

Critical Perspectives on African Politics Clive Gabbay, Carl Death, 2014-05-09 Strong states and strong civil societies are now increasingly hailed as the twin drivers of a rising Africa. Current attempts to support growth and democracy are part of a longer history of promoting projects of disciplinary regulatory and liberal rule and values beyond the West. Yet this is not simply Western domination of a passive continent. Such an interpretation misses out on the complexities and nuances of the politics of state building and civil society promotion and the central role of African agency. Drawing upon critical theory, including postcolonial and governmentality approaches, this book interrogates international practices of state building and civil society support in Africa. It seeks to develop a theoretically informed critical approach to discourses and interventions such as those associated with broadly Western initiatives in Africa. In doing so, the book highlights the power relations, inequalities, coercion, and violence that are deeply implicated within contemporary international interventions on the African continent. Providing a range of empirical cases and theoretical approaches, the chapters are united by their critical treatment of political dynamics in Africa. This book will be of interest to students and scholars of African politics, development studies, postcolonial theory, International Relations, international political economy, and peacekeeping making.

The Theory and Practice of African Politics Christian P. Potholm, 1979 *The State in Africa* Jean-François Bayart, 1993 Examines the role and structure of the state in Africa. Amongst the areas considered are the genesis of the state, the decision to pursue conservative modernization or social revolution, the formation of an historic postcolonial bloc, and entrepreneurs, factions, and political networks.

Regionalism and the Political Allegiances of Black South Africans Stephen P. Rule, 1992 **An Introduction to African Politics** Alex Thomson, 2022-12-30 This fully updated fifth edition of *An Introduction to African Politics* is an ideal textbook for those new to the study of this fascinating continent. Charting trends in government over six decades of the post-colonial era, the book tackles key questions such as: How have African states made sense of their colonial inheritance? How relevant are ethnic

and religious identities Why have some states collapsed and others prospered Why did the one party state fail Why is contemporary Africa now dominated by electoral authoritarian states and not the multi party democracies promised in the 1990s Key features include thematically organised with chapters exploring issues such as colonialism ethnicity nationalism religion social class ideology legitimacy authority sovereignty and democracy new five part structure makes clearer Africa s political evolution over time new chapter on the emergence of hybrid states and electoral authoritarianism more coverage of twenty first century governance trends such as China s impact the changing role of the military different uses of client patron networks Western conditionality and the Africa rising debate colour presentation of maps photos and data boxed case studies including Mali Tanzania Nigeria Botswana Cote d'Ivoire Uganda Somalia Ghana the Democratic Republic of the Congo Tunisia and Angola each chapter concludes with key terms and definitions questions and further reading An Introduction to African Politics is essential reading for students seeking an accessible introduction to the complex social relationships and events that characterise the politics of post colonial Africa

African States since Independence Darin Christensen, David D. Laitin, 2019-05-28 Authors Christensen and Laitin argue that an interplay of geographic historical and demographic factors undergird sub Saharan states post independence struggles to eradicate poverty establish democratic accountability and quell civil unrest They set out the founding fathers challenges in transforming their postcolonial states many of which are ethnically diverse geographically diffuse sparsely populated and lacking in administrative capacity With the legacies of the slave trade partition Christian missionaries and extractive colonial institutions complicating their efforts many African states faced stagnation authoritarianism and civil strife Recent years have seen promising attempts to restore democracy to states under authoritarian rule and to liberalize their economies suggesting that the region is moving toward a new era Relying on the best statistical data and richly illustrated with case material this book is an indispensable source for scholars and policy analysts seeking to understand Africa s post independence political trajectories

States and Power in Africa Jeffrey Herbst, 2014-12-21 Theories of international relations assumed to be universally applicable have failed to explain the creation of states in Africa There the interaction of power and space is dramatically different from what occurred in Europe In States and Power in Africa Jeffrey Herbst places the African state building process in a truly comparative perspective Herbst s bold contention that the conditions now facing African state builders existed long before European penetration of the continent is sure to provoke controversy for it runs counter to the prevailing assumption that colonialism changed everything This revised edition includes a new preface in which the author links the enormous changes that have

taken place in Africa over the past fifteen years to long term state consolidation The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure *Policy Speech* Kwazulu (South Africa). Development Policy in Africa Joachim Voss,1973 **Ghana 1990 Conference Papers** ,1990 Non-western Theories of Development Howard J. Wiarda,1998 This collection of essays is the only political science text to examine and analyze the models of development for non western countries Focusing on theories of development indigenous to each region surveyed this innovative text wrestles with the conflict between cultural relativism and universalism in a way that provokes students to react and interact
