Model 15 Commodore Hot Water Boilers  
Model 15 Senior Hot Water Boilers

This manual is supplied to the boiler owner and operator with information regarding installation, startup, operation, and maintenance. It is the ultimate responsibility of the boiler owner to safely and responsibly operate and maintain this equipment.

When received, the boiler should be thoroughly inspected for any damage that could occur in shipping. It is important to note any damage or unusual conditions on the bill of lading. A welded structural steel base is provided for lifting the boiler from underneath. Lifting eyes are provided for lifting the boiler from above. Do not lift the boiler by any other means.

Sellers Horizontal Immersion Hot Water Boilers are delivered completely assembled. Controls are installed on the boiler when practical. Any control not installed on the boiler will be designated on packing lists as "shipped loose". All wiring to the factory-installed controls is complete. The boiler is supplied with insulation and a sheet metal jacket. The boiler should be placed in a properly designed boiler or mechanical room. The water and gas lines must be properly connected to the boiler and a properly designed electrical power supply should be connected to the boiler at the wiring junction box provided at the hinge of the boiler. The boiler flue gas outlet should be connected and sealed to a properly designed stack or exhaust system.

All Sellers Boilers are factory tested and all operating controls are carefully checked for proper operation before shipment from the factory. The boiler should be installed in accordance with these instructions, properly started, and adjusted in order to obtain optimum performance and trouble free operation.
