**Religion, Politics and Society in Modern Turkey** Istar

Gozaydin, 2024-08-31 This book is a critical reading of Turkey's entanglement and struggle with modernity Islam diversity democracy and human rights liberties over the last two centuries Its major argument is that the relationship between religion and state forms an important dimension not only of official state ideology but also of interrelations between different groups in society and in those groups relations with the state The book provides an overarching view of modern Turkey's religion politics and society over an extended period and examines the complex relations between society religion laicite state identity and their reflections in state power and daily life This book's originality and novelty stems from its examination of religion politics and society in modern Turkey over an extended period from the Ottoman era to current times

*Political and Judicial Rights through the Prism of Religious Belief* Carl Sterkens, Hans-Georg Ziebertz, 2018-10-24

This innovative volume is focused on the relationship between religion on the one hand and political and judicial rights on the other At a time when the so called checks and balances that guarantee the vulnerable equilibrium between legislative executive and judicial branches of governance are increasingly under pressure this book offers valuable insights It presents empirical work that has measured young people's attitudes and explains the variety found across their views Readers will find answers to the question To what extent do youths in different countries support political and judicial human rights and what influences their attitudes towards these rights The political rights in this question include among others active and passive voting right the right to protest and the rights of refugees Judicial rights refer in general to the right of a fair trial and include principles like equality before the law the right to independent and impartial judgement the presumption of innocence the right to legal counsel and the privilege against self incrimination Expert contributing authors look at aspects such as religious beliefs and practices personal evaluation of state authorities and personality characteristics The authors discuss contextual determinants for attitudes towards political and judicial rights in both theory and empirical indicators Numerous helpful tables and figures support the written word This book makes an original contribution to research through the empirical clarification of factors

that induce or reduce people's support of political and judicial rights. It will appeal to graduates and researchers in religious studies, philosophy or sociology of religion among other disciplines but it will also interest the general reader who is concerned with matters of human rights and social justice.

### **Religion, Politics, and Identity in a Changing South**

**Africa** Abdulkader Tayob, Wolfram Weisse, David Chidester, What is the role of religion in society? In the wake of September 11, public intellectuals provided easy answers. According to some, religion was the problem; others commented religion was the solution. Generally, public debate about the force of religion in society has been organized by either/or propositions: Religion is a force for either freedom or bondage, for either peace or war, for either mutual recognition or antagonistic polarization. Analysis of religion and social change has also tended to be framed in terms of oppositions that inform research agendas and public policy. In this book, authors from South Africa, the United States of America, the Netherlands, and Germany test these oppositions.

### **Some Aspects of Behavior and Social Groups** Frederick Archibald Dewey, 1915

### **Religious**

**Politics in Global and Comparative Perspective** William H. Swatos Jr., 1989-09-07. Current social and political theories which tend to dismiss religious resurgence as a deviant occurrence in the broad sweep of history do not provide an adequate framework for the study of the dramatic resurgence of religion as a worldwide political force. This book is the first to address the interplay of religion and politics systematically and on a global scale. Offering interpretive essays as well as quantitative comparative analyses, it develops a comprehensive theoretical framework and presents the most complete comparative account available of the realities of religious politics in the contemporary world. The first of the interpretive chapters focuses on the cultural factor as a means of clarifying the role of religion in the modern world system. The next two chapters examine the concept of the self in the context of globalization and the absence of solidarity as a unifying force in societal systems. The role of ultimate values in politics and the reasons for the emergence of militant religious movements in nation-states is also considered. A worldwide study of religious change between 1900 and 1980 gives a clear picture of contemporary global religious movements and formulates a tentative set of explanations of change based on data analysis. The statistical links between religious beliefs and political views and between religion and democracy are explored. The editor's concluding chapter looks at the implications of the authors' findings for general theory in the sociology of religion. The editor stresses the need for reconceptualizing basic theoretical constructs, particularly the concept of religion itself. An important contribution to our understanding of the religious and political forces that are shaping the modern world, this work will be of interest to academics, researchers, and students of world religions, sociology, and political science.
