Some Choice Law Medicine And The Market

Mary Donnelly

Some Choice Law Medicine And The Market:

Some Choice George J. Annas, 1998 This book is a passionate critique of the shallowness of choice rhetoric used to camouflage critical personal and public policy issues in contemporary debates in American medicine. Our public discourse on life and death from health care to medical research and from risky behavior to assisted suicide is dominated by the market model of consumerism augmented by appeals to individual freedom. In fact however in most cases there is no real choice left for individuals to make the important choices have been made by others and the illusion of choice fosters complacency. Knee jerk libertarianism leads to a superficial consumer culture and life choices valued only by their monetary value. **Some Choice** uses the cases of cloning, drive through deliveries, emergency medicine, genetic privacy, human experimentation, tobacco control and physician assisted suicide among others to suggest ways in which we can break through our vapid and superficial public discourse on life and death issues and begin to engage in a public dialogue that enriches our lives and society rather than cheapens them. George Annas is one of the most widely recognized names in current bioethics debates. His goal in this new book is to help open a national and international dialogue that sees the search for universal human rights as valuable and international cooperation to define, protect and promote them as central to life.

Healthcare Decision-Making and the Law

Mary Donnelly, 2010-11-18 This analysis of the law's approach to healthcare decision making critiques its liberal foundations in respect of three categories of people: adults with capacity, adults without capacity and adults who are subject to mental health legislation. Focusing primarily on the law in England and Wales, the analysis also draws on the law in the United States, legal positions in Australia, Canada, Ireland, New Zealand and Scotland, and on the human rights protections provided by the ECHR and the Convention on the Rights of Persons with Disabilities. Having identified the limitations of a legal view of autonomy as primarily a principle of non interference, Mary Donnelly questions the effectiveness of capacity as a gatekeeper for the right of autonomy and advocates both an increased role for human rights in developing the conceptual basis for the law and the grounding of future legal developments in a close empirical interrogation of the law in practice.

Distributive Justice and the New Medicine George Patrick Smith, 2010-01-01 Smith has packed an incredible amount of information into this relatively short and clearly written book. His erudition is unquestionable and his knowledge of current trends in medical technology and the ethical issues surrounding them is obvious on every page. P. Jenkins' **Choice** George P. Smith is one of the world's leading experts on the legal and ethical issues raised by modern medicine. His book is a wide ranging and deeply informed and considered analysis of those issues with particular emphasis on the inequality with which the benefits of modern medicine are bestowed on the sick. Knowledgeable as well about the technical aspects of the biomedical revolution, Smith writes with insight and authority and offers a perspective that will influence the policy debates. Richard A. Posner, United States Court of Appeals for the Seventh Circuit and University of Chicago Law School, US. While much has been written about the various issues addressed in this book, genetics, cloning, informed consent, organ donation

Smith's book moves beyond traditional legal analysis tying these issues together by examining them through the lens of distributive justice. He thus provides the reader with a unique and valuable perspective on this important area. *Distributive Justice and the New Medicine* will be of interest to all those interested in health law and bioethics and in particular for those interested in distributive justice. Belinda Bennett, Journal of Law, Social Justice and Global Development. Professor George P. Smith's *Distributive Justice and the New Medicine* is a major new work by one of the world's leading medical lawyers. This book brings important new insights into the complex area of rationing health care resources and should be read by anyone interested in seeking to create a just society. Jonathan Herring, Exeter College, University of Oxford, UK. Is the advancement of scientific knowledge and the development of biomedical technologies known as the New Medicine desirable? George P. Smith asks this fundamental question while also confronting the distribution of these scarce medical resources. Law, economics, medical science, philosophy and ethics all coalesce in this discussion of how to structure normative standards of conduct that will improve the quality of human life. The author begins by examining various economic constructs as aids for achieving a fair and equitable delivery of health care services. He then assesses their level of practical application and evaluates the costs and benefits to society of pursuing the development and use of the New Medicine. The book ends with a case study of organ and tissue transplantation that illustrates the implementation of distributive justice. The author concludes that as long as clinical medicine maintains its focus on healing and alleviating suffering among patients a point of equilibrium will be reached that advances the common good. This timely and compelling exploration will be a must read for scholars, researchers, policymakers and all those interested in advances in medical technology and the issues surrounding access to health care.

Health Care Reform and the Law in Canada Timothy Caulfield, Barbara von Tigerstrom, 2002. Sweeping changes are being proposed as Canadians examine our health care system. But what are the legal implications of health care reform? In this timely collection, lawyers and legal scholars discuss a variety of topics in health care reform, including regulation of private care, interpretation of the Canada Health Act and the constitutional implications of proposed reforms. Barbara von Tigerstrom is currently studying at the University of Cambridge in England. Timothy Caulfield lives in Edmonton where he teaches at the University of Alberta.

Law and Global Health Michael Freeman, Sarah Hawkes, Belinda Bennett, 2014-05-29. Current Legal Issues like its sister volume *Current Legal Problems* now available in journal format is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline and analyses points of controversy in the use and abuse of extra legal arguments within legal theory and practice. *Law and Global Health* the sixteenth volume in the *Current Legal Issues* series offers an insight into the scholarship examining the relationship between global health and the law. Covering a wide range of areas from all over the world, articles in the volume look at areas of

human rights vulnerable populations ethical issues legal responses and governance *The American Medical Ethics Revolution* Robert Baker,1999-12-13 D from the Introduction Canadian Bulletin of Medical History American Bioethics George J. Annas,2009 Bioethics was born in the USA and the values American bioethics embrace are based on American law including liberty and justice This book crosses the borders between bioethics and law but moves beyond the domestic law bioethics struggles for dominance by exploring attempts to articulate universal principles based on international human rights The isolationism of bioethics in the US is not tenable in the wake of scientific triumphs like decoding the human genome and civilizational tragedies like international terrorism Annas argues that by crossing boundaries which have artificially separated bioethics and health law from the international human rights movement American bioethics can be reborn as a global force for good instead of serving mainly the purposes of US academics This thesis is explored in a variety of international contexts such as terrorism and genetic engineering and in US domestic disputes such as patient rights and market medicine The citizens of the world have created two universal codes science has sequenced the human genome and the United Nations has produced the Universal Declaration of Human Rights The challenge for American bioethics is to combine these two great codes in imaginative and constructive ways to make the world a better and healthier place to live
