Agent based modeling and simulation ABMS a way to simulate a large number of choices by individual actors is one of the
most exciting practical developments in business modeling since the invention of relational databases It represents a new
way to understand data and generate information that has never been available before a way for businesses to view the

to have far reaching effects on the way that businesses in many areas use computers to support practical decision making
Managing Business Complexity is the first complete business oriented agent based modeling and simulation resource It has
three purposes first to teach readers how to think about ABMS that is about agents and their interactions second to teach
readers how to explain the features and advantages of ABMS to other people and third to teach readers how to actually
implement ABMS by building agent based simulations It is intended to be a complete ABMS resource accessible to readers
