Raiser,2017-11-30 Cities and city regions are undergoing rapid transformation They are prime locations of innovation while

at the same time facing growing problems of spatial fragmentation and social exclusion By addressing these problems cities

become forerunners for new patterns of governance which include increasingly private actors While research on global cities

has focused primarily on the world s leading financial and economic centres comparative research on the changing role of

large complex cities in the developing world is less advanced But it is here where public problems are most seriously

revisits the same set of cities from different angles thereby reflecting urban contradictions juxtapositions and disjunctions
