## Germany Since World War II:

### **World War II Memory and Contested Commemorations in Europe and Russia** Jennifer A. Yoder, 2024-01-01

Instrumentalization of the wartime past for political gain is the subject of this study of eleven World War II commemorations. Using a comparative conceptually original approach Yoder identifies the actors who manipulate memory surrounding wartime anniversaries such as the bombing of Dresden and ceremonies to honor fallen soldiers and fascist collaborators. The cases of memory contestation span three geographic regions Western Europe Eastern Europe and Russia recognizing that each developed distinctive interpretations of the war and different patterns of memory politics. This empirically rich study reveals the grievances that motivate memory challengers and their strategies for shaping the commemoration discourses and rituals. The memory challengers toolkit includes varieties of emotional manipulation subtle distortion revisionism and full scale denial. The study finds that while there are differences in context and strategy across cases and regions there are also areas of convergence. Moreover a memory challenge in one country can spill over into others with serious consequences for foreign relations. While *World War II Memory and Contested Commemorations in Europe and Russia* deals with debates and narratives about events in the last century its focus is on power persuasion and identity in the present.

**Political Science, Government, and Public Policy Series. Annual Supplement** Universal Reference System,1972 **Shadow on the White House**

David L. Anderson,1993 Harry Truman's administration began searching for an American response to the clash in Indochina between French colonialism and Vietminh communism in 1945 Thirty years and five administrations later Gerald Ford and his aides tried unsuccessfully to solicit additional aid for South Vietnam from a reluctant Congress For Truman Ford and every American leader in between the dilemma in Vietnam hung ominously over the presidency In Shadow on the White House seven prominent historians examine how the leadership of six presidents and an issue that grew into a difficult and often unpopular war shaped each other Focusing on the personalities politics priorities and actions of the presidents as they confronted Vietnam the authors consider the expansion of presidential power in foreign policy formulation since World War II

In their analyses they chronicle the history of executive leadership as it related to Vietnam assess presidential prerogatives and motives on war and peace issues and clarify the interconnection between the modern presidency and the nation's frustrating tragic and humiliating failure in Southeast Asia. Although other histories have been written about the Vietnam experience this book is the first systematic and comparative survey on presidential leadership as it relates to the war issue. It is organized by presidential administrations giving a detailed examination of each president's decisions and policies. Based on the most recently opened archival sources the essays provide a framework on which to hang the kaleidoscopic events of the war. Weinberg,1995-02-24 Reflecting on the greatest war in human history one cannot help but think about the terrible conflict as a whole its leaders its peoples and the puzzles still open about its conduct. Leaders on both sides realised that at stake from the very beginning was a complete restructuring of the world order. More than a conflict of imperial aggression World War II was about who would live and command the globe's resources and which peoples would disappear entirely because they were believed to be inferior or undesirable by the victor. This collection of special studies in twentieth century German and world history illuminates the nature of the Nazi system and its impact on Germany and the world. Bringing together essays now widely scattered and several never previously published in English this volume examines the Holocaust the connections between the European and Pacific theatres of war as well as the effects leaders and research problems of World War II. By examining the effects of World War II its leaders its problems and the Holocaust this volume provides an illuminating study of the nature of the Nazi system and its impact on Germany and the world.    **Quest for Decisive Victory** Robert Michael Citino,2002 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign. But by the mid 19th century the emergence of massive armies and advanced weaponry and the concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory. Great battles had become curiously indecisive decisive campaigns virtually impossible.    **Red Spies in America** Katherine Amelia Sibley,2004 The most detailed study of Soviet military industrial espionage during the 1930s 1940s and 1950s spying aimed specifically at acquiring restricted information and materials relating to American industry technology and science.    **The Western Heritage: To 1715** Donald Kagan,Steven E.
