*Economic Outlook, Europe, October 2024* International Monetary Fund. European Dept.,2024-10-24 Europe s economy is recovering benefiting from a strong crises response Yet the recovery is falling short of its full potential Uncertainty about persistent core inflation policy directions and geopolitical conflicts is dampening the near term outlook In the longer term perennially weak productivity growth a result of limited scale and business dynamism amid new headwinds from fragmentation and climate change are holding back growth potential Steady macro policies are needed to navigate an uncertain environment This requires transitioning to a neutral monetary policy stance and reducing fiscal deficits without

jeopardizing the recovery Policymakers also need to tackle barriers to higher potential growth A larger and more integrated single market for goods services and capital will incentivize investment innovation and generate scale benefits Deepening European integration will also strengthen economic resilience by insulating businesses and labor markets from global fragmentation pressures These are formidable policy challenges but now is the time to bring Europe to its full potential
