*Brave New E-world (In 2 Volumes)* Michael Gurvitch, 2022-09-27 In this two volume work writing for a general audience Dr Michael Gurvitch proposes a unifying concept of electronics which combines the history of electronics with the science of evolution Drawing on his long experience in scientific development Gurvitch illuminates electronics from the inside using the point of view of a practicing scientist What is elusive and often overlooked becomes palpable engaging and even humorous with the author s tireless and methodical exposition of fundamental scientific roots from which electronics grew and continues to grow This set contains both volumes of Brave New e World presenting the historical review of electronics from the middle of the 18th century to the present day From the telegraph to the quantum computer and superconductors Gurvitch combines personal recollections with scientific knowledge to advance the final thesis the representation of a new non biological evolution in electronics This is all done in an intellectually engaging way spiced by historical anecdotes warmed by Gurvitch s enthusiastic love for science and completed with the full participation of the reader The concluding argument on electronic evolution is alarming but it might prove to be a necessary concern in the continual development of electronic technologies
