Gregory Wojtkowski, Wita Wojtkowski, Stanislaw Wrycza, 2012-12-06 This book is a result of the Seventh International Conference on Information Systems Development Methods and Tools Theory and Practice held in Bled Slovenia September 21-23 1998. The purpose of the conference was to address issues facing academia and industry when specifying, developing, managing and improving information computerized systems. During the past few years many new concepts and approaches emerged in the Information Systems Development (ISD) field. The various theories, methods and tools available to system developers also bring problems such as choosing the most effective approach for a specific task. This conference provides a meeting place for IS researchers and practitioners from Eastern and Western Europe as well as from other parts of the world. An objective of the conference is not only to share scientific knowledge and interests but to establish strong professional ties among the participants. The Seventh International Conference on Information Systems Development (ISD '98) continues the concepts of the first Polish-Scandinavian Seminar on Current Trends in Information Systems Development Methodologies held in Gdansk, Poland in 1988. Through the years the Seminar developed into the International Conference on Information Systems Development (ISD '99) will be held in Boise, Idaho. The selection of papers was carried out by the International Program Committee. All papers were reviewed in advance by three people. Papers were judged according to their originality, relevance and presentation quality. All papers were judged only on their own merits, independent of other submissions. *Understanding, Preventing, and Litigating Year 2000 Issues* Michael A. Aisenberg, 1999
