Ujulu Tesso Benti,2018-05-31 The early non Oromo writers have distorted the history of the Oromo Without scientific research they were speaking of the so called Oromo migration of the 16th century Against the unscientific thesis of the early scholars this work confirmed the Oromo to be not only the indigenous African peoples but also belong to the Cushitic Africans who invented the first world civilization Their egalitarian and holistic culture the gadaa system is part of the ancient Cushitic civilization It is the base for modern democratic system of governance The root word of gadaa is originated from Ka the creator God of the ancient religion of the Cushitic Africans From this very name Ka originated the Oromo word Waaqa which also means creator of everything This shows that the Oromo are among the first nations who came up with the idea of monotheism Therefore this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion OIR as Satanism and its religious experts the Qaalluus as witchdoctors or sorcerers This dissertation discovered many identical similar partial similar and few differing elements between the Oromo Indigenous Religion OIR and Oromo Christianity OC Also the study identified many Oromo cultural elements that are compatible to Christianity therefore must be adopted by the Oromo Christianity According modern scholarship God revealed himself in every human culture and religion is part of human culture Therefore no religion can claim to be the only true religion Based on this principle this dissertation calls all leaders of religious institutions in Oromia to change their attitude develop culture of tolerance conduct constructive religious dialogue create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity    *The Political Economy of an African Society in Transformation: the Case of Macca Oromo (Ethiopia)* Tesema Ta'a,2006 The official historiography of the Ethiopian Empire as well as the majority of the publications on Ethiopian history by European authors used to view the country as a single cultural whole and to deal only with the history of the Christian empire The different historical experiences of the Ethiopian multiethnic society and culture used to be usually ignored In contrast to such one sided approach this book deals with the Macca Oromo activities social transformation and historical experiences in the western part of Central Ethiopia focusing on the political economy of the region The sources for the book include 1 written documents in Ethiopian languages Amharic and Ge'ez e g archival materials 2 reports by European travellers and missionaries 3 recent secondary literature and 4 traditions and oral history collected mainly in Wallagga in 1972 73 and 1979 80 In that region the Macca states had played an important political and economical role until they were subjugated by the order of Menelik II and incorporated into the Ethiopian Empire at the end of the 19th century Tesema Ta'a belongs to the first generation of the Ethiopian historiographers who graduated from Addis Ababa University in the seventies and later

*Spatial Approaches in African Archaeology* Cameron Gokee,Carla Klehm,2023-01-01 This book explores the interplay between African archaeology and geospatial methods from three broad perspectives First several contributors examine the technical possibilities and limits of using satellite imagery to detect archaeological sites and model their physical environs A second perspective is the integration of new geospatial data and methods into site and landscape scale analyses to better address questions about social organization and subjective experience in African pasts A final perspective considers the interplay between geospatial technologies and community archaeology in Africa Recognizing that GIS and RS supersede traditional divisions in African archaeology such as different periods geographic regions and theoretical orientations the chapters aim to be widely applicable Arranged by methodological emphasis the case studies move from technical discussions of specific geospatial tools to general applications for addressing

specific sociohistorical topics Each chapter clearly explains the links between their archaeological questions and analytical methods as well as how their results advance our understanding of African pasts and heritage resources Many of the chapters can serve as learning models for archaeologists who are new to GIS or curious about its applications to their work Others represent recent advances in geospatial applications of greater interest to more seasoned GIS practitioners demonstrating the potential for African scholarship to contribute to methodological innovations This book is of interest to students and researchers of African and historical archaeology and anthropology Previously published in African Archaeological Review Volume 37 issue 1 March 2020
