Sun Dogs:

Reports of Planetary Geology Program - 1980 ,1980 **Sky Illusions** Kaia Stonebrook, AI, 2025-02-19 Sky Illusions explores the captivating world of atmospheric optics revealing the science behind phenomena like shimmering halos and mirages. These aren't mere tricks of light but real occurrences influenced by atmospheric conditions. The book delves into how ice crystals create halos and sun dogs through light refraction and how temperature gradients cause mirages bending light to create illusions of water or displaced objects. Understanding these sky illusions offers insights into weather patterns and the atmosphere's composition. The book begins with the basic properties of light and atmospheric elements then progresses through halos, mirages, and other intriguing illusions like glories and coronas. It connects these phenomena to physics, meteorology, and geography, demonstrating how observing these illusions can provide valuable information about atmospheric conditions. This approach allows readers to not only understand the science but also to identify and interpret these phenomena, enhancing their appreciation of the natural world. Sky Illusions uniquely combines scientific explanations with practical observation, making complex concepts accessible. The book's value lies in its ability to transform casual sky observation into informed interpretation, aiding in weather forecasting and deepening our understanding of the environment.

In the Footsteps of the Traveller Chris M. Cannon, 2025-04-10 Teachings from the stars. Much more than stories about the sky, Indigenous astronomies provide powerful, centuries-old models of knowing, being, and relating to the world. Through collaboration with more than sixty-five Dene Elders and culture bearers across thirty-four communities in Alaska and Canada, *In the Footsteps of the Traveller* reveals the significance of the stars to Northern Dene life, language, and culture. At the centre of these knowledge systems is the Traveller, a being who journeyed around the world in Ancient Time before incarnating among the stars. The Traveller constellation is a teacher, a gamekeeper, a guardian, and a practical guide for wayfinding. The Traveller, together with a host of other celestial and atmospheric phenomena like thunder and the northern lights, bridges the divide between earth and sky, instilling balance and instructing people on how to live with each other and their environments. This study combines interviews, stunning photographs, and detailed illustrations of the northern night sky. Author Chris M. Cannon's own experiential learning and a foreword from Chief Fred Sangris of Yellowknives Dene First Nation. Rooted in years of collaborative fieldwork, *In the Footsteps of the Traveller* leads the way to deeper understandings of Northern Dene astronomical knowledge.
