Kaufman,2012-11-13 Creative teaching as well as teaching creativity are cutting edge issues in psychology today as recent academic and popular media coverage has shown This volume expands on that interest with chapter authors drawn from interdisciplinary areas It includes examples of creatively teaching across the education system including preschool K 12 undergraduate and graduate level education The variety of subjects covered by the chapters include psychology math science and reading In addition to creative teaching which may lead to enhanced learning and achievement in students as well enhanced creativity another focus is teaching with the objective to enhance creativity      Effects of a Strategy for Teaching Creative Behavior Floyce R. Ballard,1976 A study that tested two third grade sections of an elementary school in Mississippi to determine if a strategy designed for teaching creativity produced a statistically significant difference in the level of creative behavior in pupils from that in pupils not subjected to a strategy for teaching creativity      Rewarding Creative Behavior Ellis Paul Torrance,1965      **School Transformation and Social Change** Jolanta Szempruch,Katarzyna Potyrała,2022-04-11 What are the challenges and needs of society that schools face This publication focuses on the transformation of the school towards a learning organization in the society The authors present the model of school transformation supporting it with the theory of transformational leadership and a description of contemporary school functions in the individual and social dimensions The main reflection is grounded in the assumption that an institution where the interactions between the present and the image of the future are particularly visible is school essentially focused on the anticipation of emerging civilization trends and new opportunities Modern schools are particularly expected to promote functions related to the preparation for active life involved in creating the world in changing conditions and functions related to the universalization of life patterns while maintaining the identity and subjectivity of groups and individuals      **The International Handbook on Innovation** Larisa V Shavinina,2003-10-16 The breadth of this work will allow the reader to acquire a comprehensive and panoramic picture of the nature of innovation within a single handbook      *Handbook of Creativity* John A. Glover,Royce R. Ronning,Cecil R. Reynolds,2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a

profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views
