**Task-Based Language Teaching in Foreign Language Contexts** Ali Shehadeh, Christine A. Coombe, 2012-10-17 This volume extends the Task Based Language Teaching Issues Research and Practice books series by deliberately exploring the potential of task based language teaching TBLT in a range of EFL contexts. It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts particularly where English is not the dominant language. By including contributions from settings as varied as Japan China Korea Venezuela Turkey Spain and France this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse not least because it must respond to the distinct contexts constraints and possibilities of foreign language learning. The book will be of interest to SLA researchers and students in applied linguistics and TESOL. It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners

Kramsch, 1994 **Teaching Language in Context** Alice Omaggio Hadley, 1986 **Understanding Language Classroom Contexts** Martin Wedell, Angi Malderez, 2013-04-11

Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed
