Communication in China Yuezhi Zhao,2008-03-20 The

stakes for control over the means of communication in China have never been so high as the country struggles with

breathtaking social change This authoritative book analyzes the key dimensions of the transformation in China's

communication system since the early 1990s and examines the highly fluid and potentially explosive dynamics of

communication power and social contestation during China's rapid rise as a global power Yuezhi Zhao begins with an

analysis of the party state's reconfiguration of political economic and ideological power in the Chinese communication system. She then explores the processes and social implications of domestic and foreign capital formation in the communication industry. Drawing on media and Internet debates on fundamental political economic and social issues in contemporary China, the book concludes with a nuanced depiction of the pitched and uneven battles for access and control among different social forces. Locating developments in Chinese communication within the nexus of state market and society, the author analyzes how the legacies of socialism continue to cast a long shadow. The book not only provides a multifaceted and interdisciplinary portrait of contemporary Chinese communication but also explores profound questions regarding the nature of the state, the dynamics of class formation and the trajectory of China's epochal social transformation.

The Citizen and the Chinese State

Perry Keller, 2017-03-02 This volume addresses several core questions regarding the nature of law in China and its future development. In particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity.
