the nature of academic life will appreciate this intellectual autobiography written by one of America's leading sociologists. Following his family tradition, *The Education of Henry Adams* was written by his great uncle George Caspar Homans, who describes how his ideas about the proper nature of theory in social science both in form and content have developed over time. The chief interest of the book lies in the description of this process. Homans' career has spanned many of the key periods of development in social research and his own work has been central to the process. He was the first major sociologist to outline the sociological implications of psychologists' work on learning or behavior theory. His contributions to modern sociology have had a major impact on the study of small groups, the problem of theory and methods of theory construction, and the study of basic characteristics of social behavior. He is regarded as the father of social exchange theory. Homans considers academic and intellectual as well as nonacademic influences on his development, personalities of highly idiosyncratic individuals against whose views of culturalism, functionalism, and structuralism he reacted, discussions with colleagues, reading, as well as his ancestry, his childhood in Boston, his literary education, and later social life in Boston, and his experiences as a sea captain in the Navy in World War II. This is an absorbing book, both an autobiography and a history of the development of the social sciences in the post World War II era.

Promoting Social Communication Howard Goldstein, Louise A. Kaczmarek, Kristina M. English, 2002. This title captures real life lessons and documents the best practices for internet based synchronous learning. Synchronous e learning or live learning presented in real time has many benefits including immediate feedback, live group learning just in time presentations, and the stability of the classroom experience. This Survival Guide does not focus on a specific software platform. Rather, it covers effective synchronous design, facilitation, and communication techniques. All content is very specific, and the practical examples shared throughout are designed to help the creators of synchronous training transition from the traditional practices of delivering classroom training.

The Synergism Hypothesis Peter A. Corning, 1983. This book represents a major theoretical synthesis between the life sciences and the social sciences. Peter Corning shows that the selective advantages arising from various kinds of cooperation, from single celled creatures to wolf packs to modern nation states, are the cause of the directional aspect of evolutionary history, that is, the progressive emergence of more complex, hierarchically organized systems in the biological, cultural, and political realms. The Synergism Hypothesis spans a vast intellectual and scientific territory and speaks to the central concerns of evolutionary biology, sociobiology, anthropology, psychology, economics, sociology, and political science. It is an extraordinary contribution which should influence all future discussions of why we behave the way we do.

Effective Behavior in Organizations Allan R.

Cohen, Stephen L. Fink, 2001 *Effective Behavior in Organizations* is a combination of text and cases with experiential exercises in the Instructor's Manual. This book seeks to provide a bridge between theory and practice by emphasizing learning at both cognitive and experiential levels. It is also unique because it covers group behavior before individual behavior. This sequencing was chosen to parallel the experience of the student within the classroom. The authors have found that early in the course students worry about finding their place within a group. Once secure in their group, students are ready to look at themselves and to explore together aspects of their personal systems.

Abstract: A college textbook discusses various theoretical concepts of consumer behavior and marketing research and their practical applications. The 21 chapters of the text are organized into 5 principal sections covering basic fundamentals and models for assessing consumer behavior; developing an understanding of consumer behavior relative to marketing strategies; environmental influences affecting consumer behavior from the general cultural/subcultural (i.e., ethnic, social class, structure, family level) and personal influence standpoints; specific determinants of consumer behavior (e.g., motivational aspects, learning and memory aspects, self-conceptual factors, attitude characteristics and their modification); and factors influencing consumer decision processes with respect to recognition of decision problems and purchasing processes and behavior. Photographs, charts, and tables are used extensively. Specific case studies are reviewed at the end of each of the 5 sections, and each chapter includes discussion questions.
