**The Poetics of Science Fiction** Peter Stockwell, 2014-06-11 The Poetics of Science Fiction uniquely uses the science of linguistics to explore the literary universe of science fiction. Developing arguments about specific texts and movements throughout the twentieth century, the book is a readable discussion of this most popular of genres. It also uses the extreme conditions offered by science fiction to develop new insights into the language of the literary context. The discussion ranges from a detailed investigation of new words and metaphors to the exploration of new worlds from pulp science fiction to the genre's literary masterpieces, its special effects and poetic expression. Speculations and extrapolations throughout the book engage the reader in thought experiments and discussion points with selected further reading, making it a useful source book for classroom and seminar.

**The Science Fiction of Poetics and the Avant-Garde Imagination** Michael Golston, 2023-11-19 How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts. This insightful playful monograph from Golston does exactly what it advertises: modeling poetics based on how poetry and some parallel artistic endeavors have filtered through a century plus of science fiction. This is not a book about science fiction in and of itself, but it is a book about the resonances of science fiction tropes and ideas in poetic language. The germ of Golston's project is a throwaway line in Robert Smithson's *Entropy and the New Monuments* about how cinema supplanted nature as inspiration for many of his fellow artists. The movies give a ritual pattern to the lives of many artists, and this induces a kind of low budget mysticism which keeps them in a perpetual trance. Golston charts how the demotic appeal of sci-fi, much like that of the B movie, cross-pollinated into poetry and other branches of the avant garde. Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin, Roman Jakobson, and Gilles Deleuze. He starts by acknowledging that, per the important work of Darko Suvin, to situate science fiction critically, the genre is premised on cognitive estrangement. But he is not interested in the specific nuts and bolts of science fiction as it exists, but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists. Golston's critical lens moves around quite a bit, but he begins with familiar enough subjects: Edgar Rice Burroughs, Mina Loy, William S. Burroughs. From there, he moves into more alien terrain: Ed Dorn's long poem *Gunslinger*, the discombobulated work of Clark

Coolidge Sun Ra Ornette Coleman and Jimi Hendrix all come under consideration The result of Golston's restless rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism Frankfurt School dialectics and Deleuzian theory to show how the avant garde inherently follows the parameters of sci fi in both theme and form *Metamorphoses of Science Fiction* Darko Suvin, 2016 Back in print for the first time since the 1980s this book is a touchstone for literary and theoretical criticism of science fiction and related genres Alongside the 1979 text this edition contains three additional essays by Suvin that update and reconsider the terms of his original intervention as well as a new introduction and preface **Cognitive Poetics** Peter Stockwell, 2002 Cognitive poetics is essentially a way of thinking about literature The reader is encouraged to re evaluate all the categories used to understand literary reading and analysis

**Metamorphoses of Science Fiction** Darko Suvin, 1980 Teaching Science Fiction A. Sawyer, P. **Human Condition** Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various scientific technological or natural conditions that differ from our own situation can be thought through and commented upon Although a scholarly work this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions
