History and Economic Life Georg

Christ, Philipp R. Rössner, 2020-02-27 History and Economic Life offers students a wide ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century. Having identified an ever widening gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians the book aims to bridge the divide by making economic history sources more accessible to students and the wider public and highlighting the need for a complementary rather than exclusive approach. Divided into two parts the book begins by equipping students with a toolbox to approach economic history sources considering the range of sources that might be of use and introducing different ways of approaching them. The second part consists of case studies that examine how economic historians use such sources helping readers to gain a sense of context and understanding of how these sources can be used. The book thereby sheds light on important debates both within and beyond the field and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis. Introducing sources often avoided in culturally minded history or statistically minded economic history courses respectively and advocating a combined quantitative and qualitative approach it is an essential resource for students undertaking source analysis within the field.

Monetary Change and Economic History in the Medieval Muslim World Andrew S. Ehrenkreutz, 1992 Andrew Ehrenkreutz is one of the scholars who have placed the study of monetary history of the medieval Middle East on a new footing integrating numismatic research into the study of economic history. The present volume brings together all his major contributions to this subject. It opens with three essays presenting an overview of economic and monetary changes in the region then continues with a series of detailed studies on its gold and silver coinages in these. Ehrenkreutz's work on standards of fineness broke new ground. The chronological focus of the volume is from the Umayyad period up to the Ayyubids but particular emphasis is given to Egypt and to the impact of the Crusades on the monetary history of the Near East. A further set of articles investigates aspects of fiscal administration and the operation of the Cairo mint. **The Medieval World** Loren Carey MacKinney, 1938 Introduction to the Economic History of European Peoples Walter Wilson Jennings, 1951 **The Medieval Near East** Eliyahu Ashtor, 1978 A Select Bibliography for the Study, Sources, and Literature of English Medieval Economic History, 1913 **English Historical Documents: 1485-1558, ed. by C.
