Roald Amundsen,2020-09-28 On February 10 1911 we started for the South to establish depots and continued our journey until April 11 We formed three depots and stored in them 3 tons of provisions including 22 hundredweight of seal meat As there were no landmarks we had to indicate the position of our depots by flags which were posted at a distance of about four miles to the east and west The first barrier afforded the best going and was specially adapted for dog sledging Thus on February 15 we did sixty two miles with sledges Each sledge weighed 660 pounds and we had six dogs for each The upper barrier surface was smooth and even There were a few crevasses here and there but we only found them dangerous at one or two points The barrier went in long regular undulations The weather was very favourable with calms or light winds The lowest temperature at this station was 49 F which was taken on March 4 When we returned to winter quarters on February 5 from a first trip we found that the Fram had already left us With joy and pride we heard from those who had stayed behind that our gallant captain had succeeded in sailing her farther south than any former ship So the good old Fram has shown the flag of Norway both farthest north and farthest south The most southerly latitude reached by the Fram was 78 41 Before the winter set in we had 60 tons of seal meat in our winter quarters this was enough for ourselves and our 110 dogs We had built eight kennels and a number of connecting tents and snow huts When we had provided for the dogs we thought of ourselves Our little hut was almost entirely covered with snow Not till the middle of April did we decide to adopt artificial light in the hut This we did with the help of a Lux lamp of 200 candle power which gave an excellent light and kept the indoor temperature at about 68 F

throughout the winter The ventilation was very satisfactory and we got sufficient fresh air The hut was directly connected with the house in which we had our workshop larder storeroom and cellar besides a single bathroom and observatory Thus we had everything within doors and easily got at in case the weather should be so cold and stormy that we could not venture out
