Khmer Ceramics, 9th-14th Century Southeast Asian Ceramic Society,1981 A collection of 120 pieces all featured in colour illustrates the art of the ancient Khmer Empire The informative text discusses finds at Angkor Chinese and Indian influences the mysteries of Ban Kruat and the ritual and utilitarian uses Book jacket **South East Asia Ceramics, Ninth Through Seventeenth Centuries** ,1976 **Oriental Trade Ceramics in South-East Asia, Ninth to Sixteenth Centuries** John Guy,1986 Glazed ceramics through their physical resilience and social relevance have become a persistent indicator of cultural contact in Southeast Asia for over a millennium of the region s history This lavishly illustrated historical survey includes introductions to technical and stylistic aspects of the ceramic traditions of China Vietnam and Thailand over two hundred illustrations of stoneware and porcelain ceramics and an extensive biography **Southeast Asian Ceramics** John N. Miksic,2009 Southeast Asia is known to many as a region teeming with tourist destinations economic opportunities and ex colonies but a lesser known facet is its colourful and myriad cultures in which ceramics form an integral part of the social fabric Focusing primarily on the Classical Period 800 1500 CE this book views ancient Southeast Asian culture through the lens of ceramic production and trade influenced but not completely overshadowed by its powerful neighbour China In this landmark publication noted archaeologist and scholar John N Miksic constructs a vivid picture of the development of Southeast Asia s unique ceramics Along with three contributing authors Pamela M Watkins Dawn F Rooney and Michael Flecker he summarizes the fruits of their research over the last forty years beginning in Singapore with the founding of the Southeast Asian Ceramic Society in 1969 The result is a comprehensive and insightful overview of the technology aesthetics and organization both economic and political of seemingly diverse territories in pre colonial Southeast Asia It is essential reading for all those with an interest in the economic history of the region and also for anyone who seeks a better understanding of the brilliant but too often underestimated material culture of Southeast Asia [Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures](#) Helaine Selin,2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science **Forts and Fortification in Wallacea** Sue O'Connor,Andrew McWilliam,Sally Brockwell,2020-09-07 This volume presents ground

breaking research on fortified sites in three parts of Wallacea by a highly regarded group of scholars from Australia Europe Southeast Asia and the United States In addition to surveying and dating defensive sites in often remote and difficult terrain the chapters provide an important and scholarly set of archaeological and ethnohistoric studies that investigate the origin of forts in Wallacea Socio political instability from climate events the materialisation of indigenous belief systems and the substantial impact of imperial expansion and European colonialism are examined and comprise a significant addition to our knowledge of conflict and warfare in an under studied part of the Indo Pacific The archaeological record for past conflict is frequently ambiguous and the contribution of warfare to social development is mired in debate and paradox Authors demonstrate that forts and other defensive constructions are costly and complicated structures that while designed and built to protect a community from a threat of imminent violence had and have complicated life histories as a result of their architectural permanence strategic locations and traditional cultural and political significance Understanding why conflict outbreaks like human colonisation often appear in the past as a punctuated event can best be approached through long term records of conflict and violence involving archaeology and allied historical disciplines as has been successfully done here The volume is essential reading for archaeologists cultural heritage managers and those with an interest in conflict studies
