American Evangelists and Tuberculosis in Modern Japan Elisheva A. Perelman, 2020-01-21 Tuberculosis ran rampant in Japan during the late Meiji and Taisho years 1880s 1920s Many of the victims of the then incurable disease were young female workers from the rural areas who were trying to support their families by working in the new textile factories The Japanese government of the time however seemed unprepared to tackle the epidemic Elisheva A Perelman argues that pragmatism and utilitarianism dominated the thinking of the administration which saw little point in providing health services to a group of politically insignificant patients This created a space for American evangelical organizations to offer their services Perelman sees the relationship between the Japanese government and the evangelists as one of moral entrepreneurship on both sides All the parties involved were trying to occupy the moral high ground In the end an uneasy but mutually beneficial arrangement was reached the government accepted the evangelists assistance in providing relief to some tuberculosis patients and the evangelists gained an opportunity to spread Christianity further in the country Nonetheless the patients remained a marginalized group as they possessed little agency over how they were treated Perelman captures the strategies that enabled Protestant missionaries to become a central force in treating tuberculosis and providing social services in prewar Japan Acting as moral entrepreneurs the medical missionaries deftly raised funds abroad gained support from the Japanese state gained converts and cultivated a corps of Japanese medical practitioners Sheldon Garon Princeton University author of *Molding Japanese Minds The State in Everyday Life* Based on a wide range of primary and secondary sources this groundbreaking book traces evangelical Christianity and the work of medical missions in late nineteenth and early twentieth century Japan It is a must read for anyone interested in the history of Christianity disease medicine or public health in modern Japan William Johnston Wesleyan University author of *The Modern Epidemic A History of Tuberculosis in Japan* *International Christian Literature Documentation Project: Author-editor index, corporate name index*, 1993

Tokyo Jeremy Seymour Eades,1999 The Tokyo region of Japan is in terms of population the largest urban area on earth Its centre comprises the 23 wards of Tokyo itself but the urban sprawl has long since extended to include the other major cities of Kawasaki and Yokohama From the early 16th century when the Tokugawa rulers of Japan established their administrative headquarters there Edo as it was known developed quickly into one of the largest cities in the world It was renamed Tokyo or Eastern Capital when the Emperor moved there in 1868 In the 20th century most of Tokyo was destroyed first by the Kanto earthquake of 1923 and then by the American bombing of 1945 Nonetheless it was rapidly rebuilt and is now along with London and New York one of the major control centres of the global economy Yet behind the ultramodern facade of the main commercial areas Tokyo remains largely a city of narrow streets and small intimate neighbourhoods However the threat of serious earthquakes remains and the relocation of the capital is being increasingly discussed This is the first annotated critical survey of the English language literature on Tokyo and its region *A History of Protestant*
