Emilio Javier Alfaro, Enrique Perez, José Franco, 2006-03-30 The international conference How does the Galaxy work Agalactic tertulia rd th with Don Cox and Ron Reynolds was held during the week of 23 to 27 of June 2003 in the marvelous city of Granada Spain This week marked the beginning of one of the hottest summers that we have ever lived but in contrast the meeting was one of the coolest events that we can remember First it certainly was a rstclass scientific reunion with an excellent program talented speakers and alive discussions in a friendly atmosphere Second the whole event was embedded in the passionate Andalusian way of life a true tertulia well seasoned with tasty tapas and perfectly marinated in cool and dry sherry wine Third the celebration was framed by some of the most beautiful settings that one can imagine we enjoyed the magnificent splendor of the Alhambra the unique Muslim Jewish Christian flavor of the Albaicin and the magical gipsy heartbeat of Sacromonte Last but not least all discussions whether they were during the sessions or at a bar table were sprinkled with the charm and wit of the two guests of honor Don Cox and Ron Reynolds The idea of having a scientific feast to celebrate their 60th birthday in Granada was actually conceived at a bar table in Seville with plenty of manzanilla at hand a couple of summers ago That perhaps was the difficult part of the project The rest was relatively easy to achieve because Don and Ron are not only remarkable astronomers but they are also great human beings Indeed we had a very positive response from all parties involved every person we talked to was enthusiastic about the celebration and wanted to give their own point of view in this tertulia      *The Galaxy*, 1872      *The Extraterrestrial Encyclopedia* David Darling, Dirk Schulze-Makuch, 2016-02-17 The Extraterrestrial Encyclopedia is an A to Z of the search for life in the Universe Entries cover astrobiology the origins and evolution of life the hunt for exoplanets SETI and extraterrestrial life in science fiction philosophy and popular speculation including UFOs The book is written in an engaging style for the layperson and contains numerous B W illustrations Keywords Encyclopedia ET SETI Science Extraterrestrial Origins Evolution Planets Universe David Darling Dirk Schulze Makuch Stars Life      **The Central Regions of the Galaxy and Galaxies** International Astronomical Union. The Galaxy Disk in Cosmological Context (IAU S254) International Astronomical Union. Symposium, Bengt Strömgren, 2009-04-16 The paradigm of a dark energy and dark matter dominated Universe with the hierarchical merger scenario for the formation of galaxies has scored impressive successes in matching the observed Universe However the theory fails to explain the difficulty in generating ordinary disk galaxies such as the Milky Way suggesting that some important physics must be missing in current models IAU Symposium 254 was organized to address this question gathering researchers from an unusually broad range of fields from cosmology to interstellar matter and the formation and evolution of stars High class reviews lectures and posters combine to define the frontiers in the field and point the way to new avenues of research This volume presents a unique set of succinct overviews illuminating the full range of topics in this very active field It also honors Danish astrophysicist Bengt Strömgren 1908-1987 who laid much of the foundation for this entire field
