A feature of the modern stage of the development of science is its personal orientation, which is manifested in the focus on the development of the intellectual creative potential of the individual. This is also related to the intensification of biographical research, when the past is understood, evaluated, compared with the present through the lives and activities of famous figures who, thanks to their creative success, have become symbols of certain historical periods, representing turning points in the progress of nations and civilizations, the development of culture, education, sciences, etc.

The documents of the collection of rare publications of the V.O. Sukhomlynskyi State Scientific and Pedagogical Library of Ukraine are a valuable source base for researchers-biographers. A significant segment of this collection consists of publications in German language of the second half of the 19th century – the early of the 20th century. Biographical editions of this period make it possible to gain valuable knowledge about the life and works of famous German teachers. For example, the name of Johann Friedrich Herbart not only entered the history of pedagogy, but also became a symbol of the pedagogical movement, the so-called "Herbartians". For the help of researchers of his biography, the fund of the V. O. Sukhomlynskyi State Scientific and Pedagogical Library of Ukraine contains publications with an overview of interesting facts from his life [1; 3; 4; 5; 6].

Separately, we note the value of the epistolary heritage of famous personalities. Epistolary sources acquire special importance for the study of the role of the individual in the development of education, culture and society in general. There are the letters of Herbart and letters addressed to him in the fund of the V. O. Sukhomlynskyi State Scientific and Pedagogical Library of Ukraine [2; 7]. Letters were and will forever remain a valuable source of information about the particularities of one or another era, the course of events experienced by an individual and society in general.

During the scientific research "Pedagogical science and education in persons, documents, bibliography" (2020–2022), researchers of the library organized a set of
