## **Soviet Defence Enigma Estimating Costs And Burden:**

**Secret Leviathan** Mark Harrison,2023-06-06 The Soviet Union was one of the most secretive states that ever existed Defended by a complex apparatus of rules and checks administered by the secret police the Soviet state had seemingly unprecedented capabilities based on its near monopoly of productive capital monolithic authority and secretive decision making But behind the scenes Soviet secrecy was double edged it raised transaction costs incentivized indecision compromised the effectiveness of government officials eroded citizens trust in institutions and in each other and led to a secretive society and an uninformed elite The result is what this book calls the secrecy capacity tradeoff a bargain in which the Soviet state accepted the reduction of state capacity as the cost of ensuring its own survival This book is the first comprehensive analytical multi faceted history of Soviet secrecy in the English language Harrison combines quantitative and qualitative evidence to evaluate the impact of secrecy on Soviet state capacity from the 1917 Bolshevik Revolution to the collapse of the Soviet Union in 1991 Based on multiple years of research in once secret Soviet era archives this book addresses two gaps in history and social science one the core role of secrecy in building and stabilizing the communist states of the twentieth century the other the corrosive effects of secrecy on the capabilities of authoritarian states

**Reluctant**

**Cold Warriors** Vladimir Kontorovich,2019 During the Cold War Western economic studies of the USSR neglected the military sector of the Soviet economy Were economic Sovietologists under political pressure and if so in what direction This book has broad relevance for national security uses of social science research today Adapted from dust jacket

**Reinterpreting Revolution in Twentieth-Century Europe** Moira Donald,Tim Rees,2017-03-14 Until the dramatic fall of Communist regimes in the East placed the possibility of revolution on the agenda once again sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe Looking back over the twentieth century it is plausible to argue that the twentieth rather than the nineteenth has been the most revolutionary of centuries In this volume leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences

**Arming the Two Koreas** Taik-Young

Hamm,2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Koreas military strength is partly a myth created by South Korea to justify a huge programme of rearmament

**Strategic Power** Carl G. **The Soviet Defence Enigma** Carl G. Jacobsen, 1987 Realistic appraisal of Soviet defence efforts is crucial to strategic planning and foreign policy analysis Since Soviet defence expenditure figures are incomplete however our knowledge in this area is extremely limited This study reviews the state of current knowledge in this field and presents a critical review of the nature and limitation of traditional approaches The contributors analyse newly available sources of economic scientific and technical military information and conclude with an in depth consideration of the relevance and impact of historical and cultural influences on current Russian Soviet military strategy There emerges a fascinating account which both extends our knowledge and understanding and sheds light on what is perhaps the single most important unknown in the study of international affairs and defence needs

**Gorbachev's Reforms** Susanne Sternthal, 1997-10-28 Gorbachev's reforms in domestic and foreign policy were motivated by the overriding objective of making Soviet socialism a legitimate and viable alternative among the world community of nations Drawing on recently opened archives this study examines the radicalization of Gorbachev's reforms and the resistance to them from the conservatives in the party apparatus and the military Gorbachev sought to demilitarize the Soviet Union from the beginning but that process took on a more revolutionary hue as he came to understand how deeply embedded Stalinism was He sought to continue where Lenin had left off believing that Stalin had sidetracked and deformed Soviet socialism Toward this end Gorbachev redefined the image of the enemy by emphasizing common human values in international relations over class conflict and altered the nature of the threat by stressing the primacy of economic over military competition Gorbachev changed the terms of political discourse and by changing the way in which the Soviet Union viewed the world he sought to make improvements in relations with the West and to decrease the military burden of his overstretched country
