## **The Formula One Pack The Most Comprehensive Interactive 3d Study On Motor Racing Ever:**

The Formula One Pack Ron Van der Meer, Adam Cooper, 1999 Detailed pop up spreads interactive elements 3D glasses a CD of racing sounds and a collection of informative booklets provide a unique view of the sport of Formula One racing. This pack brings to life the excitement of the Formula One experience. The first large paper sculpture recreates the famous Fangio driving his Maserati 250F. Another feat of paper engineering shows us the inside of an Arrows transporter revealing how cars are packed into the trailer. No amount of detail is spared as a turn of the page provides an intricate look inside a modern Formula One cockpit putting us in the driver's seat. All the details of a pit stop can be viewed on a pop up in which each crew member plays out his clearly defined role. In a treat for the true Formula One enthusiast a complete three dimensional Ferrari pop up shows the genuine complexities of the vehicle. The final spread allows us to rotate the crankshaft of a V10 racing engine to see the pistons in action. The inclusive booklets, driver cards and racetrack plans give detailed factual information that every Formula One fan will value. Red blue filter glasses included in the pack give an x-ray view of the internal working of the modern racing car and allow diagrams of good and bad driving techniques to come to life on the page. All of this can be enjoyed to the background sounds of a CD recording of a day at the races.
