The French Revolution Conflict Or Continuity:

The French Revolution Steven T. Ross, 1978 **The French Revolution: conflict or continuity?** Edited by Steven T. Ross Steven T. Ross, *The Era of the French Revolution* Ronald J. Caldwell, 1985 *The French Revolutionary and Napoleonic Wars* Jeremy Black, 2021-02-09 The wars between 1792 and 1815 saw the making of the modern world with Britain and Russia the key powers to emerge triumphant from a long period of bitter conflict In this innovative book Jeremy Black focuses on the strategic contexts and strategies involved explaining their significance both at the time and subsequently Reinterpreting French Revolutionary and Napoleonic warfare strategy and their consequences he argues that Napoleon's failure owed much to his limitations as a strategist Black uses this framework as a foundation to assess the nature of warfare the character of strategy and the eventual ascendancy of Britain and Russia in this period Rethinking the character of strategy this is the first history to look holistically at the strategies of all the leading belligerents from a global perspective It will be an essential read for military professionals students and history buffs alike **The Oxford Handbook of the French Revolution** David Andress, 2015 The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought provoking insights into the history and historiography of this epochal event Each chapter presents the foremost summations of academic thinking on key topics along with stimulating and provocative interpretations and suggestions for future research directions Placing core dimensions of the history of the French Revolution in their transnational and global contexts the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors whether the king and his ministers or the besieged leaders of the Jacobin republic and attention to the deeply local politics of both rural and urban populations Identities of class gender and ethnicity are interrogated but so too are conceptions and practices linked to citizenship community order security and freedom each in their way just as central to revolutionary experiences and equally amenable to critical analysis and reflection This Handbook covers the structural and political contexts that build up to give new views on the classic question of the origins of revolution the different dimensions of personal and social experience that illuminate the political moment of 1789 itself the goals and dilemmas of the period of constitutional monarchy the processes of destabilisation and ongoing conflict that ended that experiment the key issues surrounding the emergence and experience of terror and the short and long term legacies for both good and ill of the revolutionary trauma for France and for global politics *Men and Women in Revolution and War, 1600-1815* Thomas R. Rumsey, 1985 *Absolute War* Mark Hewitson, 2017-02-09 Wars have played a fundamental part in modern German history Although infrequent conflicts involving German states have usually been extensive and often catastrophic constituting turning points for Europe as a whole Absolute War is the first in a series of studies from Mark Hewitson that explore how such conflicts were experienced by soldiers and civilians during wartime and how they were subsequently imagined and understood during peacetime from Clausewitz and

Kleist to J nger and Adorno Without such an understanding it is difficult to make sense of the dramatic shifts characterising the politics of Germany and Europe over the past two centuries The studies argue that the ease or reluctance with which Germans went to war and the far reaching consequences of such wars on domestic politics were related to soldiers and civilians attitudes to violence and death as well as to long term transformations in contemporaries conceptualisation of conflict Absolute War reassesses the meaning of military conflict for the millions of German subjects who were directly implicated in the Revolutionary and Napoleonic Wars Based on a re reading of contemporary diaries letters memoirs official correspondence press reports pamphlets treatises plays and cartoons this volume refocuses attention on combat and conscription as the central components of new forms of mass warfare It concentrates in particular on the impact of violence killing and death on many soldiers and some civilians experiences and subsequent memories of conflict War has often been conceived of as an act of violence pushed to its utmost bounds as Clausewitz put it but the relationship between military conflicts and violent acts remains a problematic one

A History of the Modern World Robert Roswell Palmer, Joel Colton, 1992 Considers the history of the making of the modern world between 1500 and 1789 It places Europe and the European civilization in its international setting and considers individual nations from the perspective of their points of contact with a larger civilization
