## **The Future Of Creation:**

**The Future of Creation** ,1970    **Christian Eschatology and the Physical Universe** David Wilkinson,2010-05-27

Does matter matter The scientific picture of the end of the physical Universe has undergone dramatic changes since the turn of the 21st century with its future characterized by accelerated expansion and futility Yet Christian theology has been largely silent on this despite the interest in eschatology in popular culture and in theology itself What can Christian theology learn from and contribute to the scientific picture of the future of the Universe Can the biblical narratives of creation and new creation have a fruitful dialogue with scientific discoveries David Wilkinson shows what a fruitful dialogue this can be Critiquing the folk eschatology of the Left Behind series the misguided faith of the scientific optimists and the lack of scientific engagement of the theologians of hope Wilkinson argues for a rediscovery of the theological theme of new creation and the centrality of bodily resurrection

Bonzo,2009-02-01 Indwelling the Forsaken Other is a critical reading of Jurgen Moltmann s ethics of discipleship While Moltmann s notable turn to the inner life of the Trinity as a source for his reflections on the life of the church is influential it is not without problems The call emerging from Moltmann s reflection upon Trinitarian life to copy God in our relationships may offer some general direction for our actions however it also raises several questions Two important questions for this work are In what way are we to copy God and What conditions make it possible to copy God Moltmann s answers to these questions are insufficient and consequently he fails to protect the difference between Creator and creation in his analogia relationis As a result the ethical direction of Moltmann s work seems to be increasingly muddied and at best paradoxical

**Chance or Providence** Louise Hickman,2014-11-10 Belief in some sort of providence is widespread even among those who do not profess any kind of conventional religious faith The belief that some sort of benevolent divine force directs the events of the universe is one that has shaped our philosophical and theological convictions together with our economic and social political landscape The 2013 conference of the Science and Religion Forum was convened to discuss some of the most pressing questions that arise from a consideration of providence Is a belief in providence compatible with freedom What of the suffering of non human creatures Should providence be thought of as

general or as special intervention How might a belief in providence be squared with the challenges raised by scientific naturalism and the theory of evolution This book presents chapters that originated from that conference and explores a variety of responses to these critical questions Insights from both science and theology are drawn together by some of the leading thinkers in this field The result is a contribution to the theology of providence which will be of substantial value to all those interested in the conversation between science and religion
