Holt People, Places, and Change Robert J. Sager, 2003 **How Power Shapes Energy Transitions in Southeast Asia** Jens Marquardt, 2016-12-01 An understanding of the role of energy related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low carbon development Although renewable energy sources have become technically feasible and economically viable social and political factors continue to persist as the most critical obstacles for their dissemination **How Power Shapes Energy Transitions in Southeast Asia** conceptualizes power for the field of sustainable energy governance Based on empirical findings from the Philippines and Indonesia the book develops an analytical approach that incorporates power theory into a multi level governance framework The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation A power based multi level governance approach is introduced that is rooted in development thinking Examining how coordination and power relations shape the development and dissemination of renewable energy technologies the book also shows how decentralization affects low carbon development in emerging economies Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation **Encyclopedia of Energy, Natural Resource, and Environmental Economics** , 2013-03-29 Every decision about energy involves its price and cost The price of gasoline and the cost of buying from foreign producers the price of nuclear and hydroelectricity and the costs to our ecosystems the price of electricity from coal fired plants and the cost to the atmosphere Giving life to inventions lifestyle changes geopolitical shifts and things in between energy economics is of high interest to Academia Corporations and Governments For economists energy economics is one of three subdisciplines which taken together compose an economic approach to the exploitation and preservation of natural resources energy economics which focuses on energy related subjects such as renewable energy hydropower nuclear power and the political economy of energy resource economics which covers subjects in land and water use such as mining fisheries agriculture and forests environmental economics which takes a broader view of natural resources through economic concepts such as risk valuation regulation and distribution Although the three are closely related they are not often presented as an integrated whole This Encyclopedia has done just that by unifying these fields into a high quality and unique overview The only reference work that codifies the relationships among the three subdisciplines energy economics resource economics and environmental economics Understanding these relationships just became simpler Nobel Prize Winning Editor in Chief joint recipient 2007 Peace Prize Jason Shogren has demonstrated excellent team work again by coordinating and steering his Editorial Board to produce a cohesive work that guides the user seamlessly through the diverse topics This work contains in equal parts information from and about business

academic and government perspectives and is intended to serve as a tool for unifying and systematizing research and analysis in business universities and government *Renewable Energy* Dirk Assmann,2012-05-16 offers knowledge and inspiration to promote renewable energy in developing and industrialized countries Klaus Toepfer Executive Director of UNEP From technology to financing issues Renewable Energy offers a comprehensive and authoritative review of the determining factors that drive worldwide dissemination of renewable energy technologies With a clear emphasis on policy and action contributions from internationally renowned experts combine to form a holistic picture of the current status impacts and future potential of renewable energy Addressing the situation in both developing and developed countries each chapter reviews in detail a different issue to present extensive information on social environmental political economic and technological aspects This will be essential reading for professionals in renewable energy in particular policy makers researchers NGOs and energy consultants and a valuable resource for teachers and students of renewable energy
