*The American Journal of Psychiatry*, 2002-04      *Quick Reference to the American Psychiatric Association Practice Guidelines for the Treatment of Psychiatric Disorders* American Psychiatric Association, 2002. The American Psychiatric Association's evidence-based practice guidelines project has published 12 guidelines since 1993. APA's practice guidelines have been widely acclaimed as comprehensive and scholarly documents and are increasingly being used in residency education, certification examinations, utilization review, and most important, clinical decision making by psychiatrists. Although the practice guidelines provide detailed recommendations for treatment and comprehensively describe the evidence to support those recommendations, their length and format do not allow for easy use in the psychiatrist's day-to-day work with patients. To

meet this need the quick reference guides were developed to facilitate the clinical use of APA's practice guidelines by physicians. Each quick reference guide presents the major recommendations and their sequencing with enough detail to be both clinically helpful and practical to use. This compendium contains 10 quick reference guides: Alzheimer's Disease and Other Dementias of Late Life, Borderline Personality Disorder, Bipolar Disorder, Delirium, Eating Disorders, HIV/AIDS, Major Depressive Disorder, Panic Disorder, Substance Use Disorders, and Schizophrenia. Concise yet comprehensive, this compendium of guides is an indispensable reference for every clinician who treats patients with mental disorders.
