## **Success With Languages:**

*Success with Languages* Stella Hurd, Linda Murphy, 2005-10-09 *Success with Languages* is designed to help all students develop the skills they need to become an effective language learner and to make the most of language study. Written by experienced language teachers at the Open University, this book offers undergraduates and postgraduates crucial and practical advice on important areas such as choosing a language and study programme, setting personal goals for language learning and monitoring progress using ICT to support language learning. Each of the ten chapters features a number of exercises in order to help students assess the ways they learn and consider where improvements can be made, making the most of the media available and how to use resources effectively. [Learn Languages Easily. Methods of self-regulation for successful learning](#)

Andrey Ermoshin, 2018-01-11 Have you ever wanted to learn a language quickly and easily? In *Learn Languages Easily*, renowned Russian psychotherapist Andrey Ermoshin guides the reader to do just that. The solutions offered here employ his own method called psychocatalysis. This is a method of self-regulation which is built upon paying attention to your body's signals and leveraging your own internal strengths. Ermoshin offers 40 exercises that will speed up the deep learning process needed to master new knowledge. **Using ESL Students' First Language to Promote College**

**Success** Andrea Parmegiani, 2019-01-15 Emerging from a critical analysis of the global power of English and how it relates to academic literacy and culturally responsive pedagogy, this book presents translanguaging strategies for using ESL students' mother tongue as a resource for academic literacy acquisition and college success. Parmegiani offers a strong counterpoint to the English-only movement in the United States. Grounded in a case study of a learning community linking Spanish and English academic writing courses, he demonstrates that a mother tongue-based pedagogical intervention and the strategic use of minority home languages can promote English language acquisition and academic success. *Education, Dominance and Identity* Diane B. Napier, Suzanne Majhanovich, 2013-02-11 This volume is a collection of research cases illustrating the interrelationships among education, dominance, and identity in historical and contemporary contexts. The cases reflect particular ways in which local group and indigenous identities have been affected by a dominant discourse; how education can support or undermine identity; and how languages, including dominant and subdominant languages and the language of instruction in schools, are at the centre of challenges to hegemony and domination in many situations. Examining the issues in their research, the contributors reveal how members of minority disadvantaged or dominated groups and the teachers and parents of children in their schools struggle for recognition for education in their own language for acceptance within larger society or for recognition of the validity of their responses to reform initiatives and policies that address a wider agenda but that fail to take into account key factors such as perceptions and subaltern status. Collectively, the chapters document research employing a variety of methodological approaches and theoretical perspectives illustrating an array of universal and global issues in the field of comparative and international education. However, each of the cases has its own unique character as

research findings and as personal reflections based on the authors experiential knowledge in particular social cultural and political contexts The contexts and regional settings include Chile Canada the United States Hungary and elsewhere in East Central Europe France Germany Spain Malaysia Tanzania South Africa Cyprus Tunisia Egypt Iran and elsewhere in the Middle East

**Stories from Exceptional Language Learners Who Have Achieved Nativelike Proficiency** Katarina Mentzelopoulos,Zoltán Dörnyei,2022-10-25 It is generally understood that most language learners beyond a certain age are unlikely to ever reach nativelike proficiency in their second language However there exists a unique population of gifted adult learners who do triumph against all odds and achieve nativelike proficiency and their learning experiences have thus far remained a largely untapped gold mine The companion to *Lessons from Exceptional Language Learners Who Have Achieved Nativelike Proficiency* this volume presents the autobiographical learning stories of 30 such exceptional individuals opening a narrative window into their learning experiences This rich corpus of success stories reveals the many steps of these language learning journeys and the learners pathways to success A fascinating and readable collection of personal stories this volume will be of interest to non specialist language learners as a motivational primer for their own studies as well as researchers working in language learning psychology who will find the unique database of learner narratives a useful tool for future research
