## **The Ladder Of Lives:**

**The Life of the Rev. Philip Henry, A.M.** Matthew Henry, 1839      **Cosmic Code of Life** C.A. Ninan, 2015-02-12 This book relates DNA and the genetic code to consciousness as the universal principle of life. This is done through perception of seven pattern germs from DNA which are girdled into an archetypal model called the tree of life. The symbols of the tree model are logically related to the self spirit soul psyche and body. How this new approach helps to understand the phenomenon of life in its integrated wholeness and cosmic totality is explained in this book. It heralds the dawn of a new science of life which translates the innate mysticism of religions into the language of science. It provides novel keys to consciousness and creativity in relation to the transcendental horizon of the human being and the spiritual growth of humanity at large.

*The Psychology of Quality of Life* M. Joseph Sirgy, 2012-06-20 The second edition will be an update and further elaboration of the literature related to subjective well being happiness and life satisfaction. It will have a new substantial section that focuses on reviewing much of the literature of subjective well being within specific life domains: social life, material life, leisure life, work life, community life, spiritual life, family life, health life, sex life, travel life, etc. In the 1st edition the research in these various life domains was discussed only briefly. The second edition will maintain the same organizational structure of the first edition that is Part 1 will focus on introduction definitions and distinctions examples of measures of subjective well being happiness and life satisfaction and motives underlying subjective well being. Part 2 will focus on psychological strategies that allow people to optimize subjective well being by engaging in psychological processes related to the relationship between and among life domains e.g. social life, family life, love life, spiritual life, community life, financial life, etc. This part will contain four chapters related to these various inter domain processes: bottom up spillover, top down spillover, horizontal spillover, and compensation. Part 3 of the book will focus on intra domain psychological strategies designed to optimize subjective well being. These include re-evaluation based on personal history, re-evaluation based on self concept, re-evaluation based on social comparison, goal selection, goal implementation and attainment, and re-appraisal. Part 4 of the book will focus on balance processes: how people attempt to create balance in their lives using psychological processes within specific life domains, intra domain strategies and processes that relate one domain to another, inter domain strategies.
