beneath its arc Its focus is Tibet At least a few satellites pass over Tibet these days Their observations are crisp and hard terse and digital Statistics are collected while hardy people sleep softly on the land below Most of the Tibetan people have never heard of satellites They revere the sun the moon and the stars while respecting the harsh winds that can change the temper of a day in moments Although some of the stars are seen to move very quickly now the Tibetans spiritual centre remains Lhasa around which their lives gravitate no matter how far away from it their homes might be Lungta ,1998
