Language, Religion and National Identity in Europe and the Middle East John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e g German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e g Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e g Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United Netherlands and the United Kingdom

The Languages of Jerusalem Bernard Spolsky, Robert Leon Cooper, 1991 The Old City of Jerusalem small and densely populated is a complex microcosm of Israeli society It is a multilingual community characterized by unequal power relations between the speakers of the two official languages of Israel Arabs and Jews The authors begin with a sociolinguistic sketch of the Old City in the present day They then provide a historical background to their field study discussing Jewish multilingualism from the period of the Second Temple until modern times the sociolinguistics of Jerusalem one hundred years ago and the recent revival and spread of Hebrew They go on to develop a model of the rules of language choice which arises from their analysis of language use in street signs and which they then apply to language use in the market place In the final chapters they examine language learning and language spread in their social context The authors demonstrate that because of the close association between language use and social structure the study of language use in a multilingual society is at the same time both a powerful and a delicate method of studying the dynamics of group interactions

The Languages of Diaspora and Return Bernard Spolsky, 2017-01-05 Until quite recently the term Diaspora usually with the capital meant the dispersion of the Jews in many parts of the world Now it is recognized that many other groups have built communities distant from their homeland such as

Overseas Chinese South Asians Romani Armenians Syrian and Palestinian Arabs To explore the effect of exile of language repertoires the article traces the sociolinguistic development of the many Jewish Diasporas starting with the community exiled to Babylon and following through exiles in Muslim and Christian countries in the Middle Ages and later It presents the changes that occurred linguistically after Jews were granted full citizenship It then goes into details about the phenomenon and problem of the Jewish return to the homeland the revitalization and revernacularization of the Hebrew that had been a sacred and literary language and the rediasporization that accounts for the cases of maintenance of Diaspora varieties
