Markets have long been acknowledged to be a superior mechanism for managing resources but until the advent of big data
they largely functioned better in theory than in practice Now as ideal markets are within reach because of vastly greater
access to information we are on the verge of a major disruption As data becomes a more valuable asset than cash the rules
for surviving and thriving are changing Reinventing Capitalism is a provocative look at how data is reinventing markets and
in so doing is ushering in an era where the firm is no longer predominant With richer and more comprehensive information
about human wants and needs an economy powered by data offers the possibility of increased abundance equality and
resilience The data driven markets that will thrive in this environment are far better than firms at organizing human
endeavors meaning that finance driven capitalism is being displaced by its more efficient moresustainable and more
