Helping everyday home cooks master the art of cooking with joy and confidence Tired of food blogs and cookbooks that look impressive but lack practicality Find yourself Googling to figure things out while cooking Could you pull a meal together with only the ingredients you have on hand Introducing The Cook s Book your guide to mastering cooking with joy and confidence More than just a collection of recipes The Cook s Book is your ultimate kitchen companion Filled with engaging lessons techniques and strategies as well as delicious go to recipes food and wine pairings and a beginner bar cart guide this resource teaches you what you need to know to create and share great food with the people you love every day Learn how to add flavor to any dish stock your pantry care for your knives make sauces and soups from scratch cook flavorful juicy meats pick the perfect side dish stock a basic bar cart Plus go to recipes must have kitchen tools flavor layering techniques delicious food and wine pairings sensible solutions to common problems Perfect for graduates newlyweds new homeowners and new parents The Cook s Book is everything you wish your mother had taught you if she hadn t also been brought up in a time of pricey packaged convenience foods and too busy schedules Strap on an apron and get ready for flavorful meals with fabulous company An excellent resource that budding home cooks will turn to time and again Publishers Weekly starred review **The Kitchen Garden and the Cook** Cecilia Maria de Candia Pearse, 1913 *The Cook, the Diner, and the Mind* Marc Luxen, 2018-07-15 This book is NOT a how to cook book but a how to think about cooking book That is why I think this book will be interesting and useful to cooks from experienced professional cooks to people who can hardly cook Speaking of which the reasons why many people do not cook to fullest of their abilities or not at all are purely psychological reasons Just think about it anyone can acquire the physical skills to become a decent cook in a relatively short time Compared to becoming a half decent drummer or guitar player becoming a half decent cook is a walk in the park You only think you do not have the time you think are not interested you think it is all far too complicated you think you have lost interest in cooking you think are too important to cook you think you know it all already you think you are wasting your talents in the kitchen you think you think you think So we are going to pay some attention to that thinking of yours How are we going to do this Most cookbooks seem to think you do not At best you are a package of some skills and knowledge but more often you are just regarded as a soulless emotionless manipulator of tools following instructions The kitchen is a place completely disconnected from you and your world and the tools you use have nothing to do with you Dice the onion whisk until creamy I think it is high time to get you back in the kitchen In the chapter Can you cook we look at the strange finding that good cooks usually have a reasonable idea of how good they are in the kitchen but that many bad cooks have no idea how bad they are and actually are convinced they are quite good let s hope you are not one of those How do you know which one you are Read on

Then I will take you back even before the stone age and make a point that we are the cooking ape we could have never become us with our large brains without cooking our food We big brained apes Homo sapiens and just before us Homo Erectus have been cooking for two million years That is astonishing because we Homo sapiens have been around for just two hundred thousand years Then I will show you how cooking our food shaped our societies made a thing like marriage necessary and put women around the fire and in the kitchen for better or for worse Next we turn to a bit of pure psychology how do we process information How do we see hear smell taste and touch You will see that we perceive the world much more with our brain than with our senses that we in fact construct the world we don't just get it We will use these insights later to explain strange effects in the kitchen why the name of a dish changes how it tastes how the shape of the serving plate the music how your brain uses almost anything to construct taste Memory is next I will show you how your memory works and how you can make it work for you in the kitchen by applying memory tricks If you realize your memory is nothing like a hard disk but more a story producing database of ever changing knowledge with a preference for pictures all sort of cool tricks become possible Now we are ready to look at multi sensory experiences and cooking We look at how you can manipulate all information around food to change experiences of the diners Here we will also have a look at the psychology of wine tasting Then we will turn to recipes and techniques and how they influence the way you think about cooking and the way you cook and how to use your kitchen your knife and dealing with mistakes Next up are the cooks and diners themselves We will look at individual differences and you will get some handy questionnaires to check what kind of cook and diner you and the ones around you are Then comes the menu how should the menu look how do you name dishes and not unimportantly how do you price them Last up is psychological aspects of cooking and eating healthy The Cook's Oracle William Kitchiner, 1825
