American Home Cooking Tim Miller,2017-07-01 American Home Cooking provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In American Home

Cooking Timothy Miller argues that there are historical reasons behind the reality of American cooking There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens At one end of the cooking and eating continuum is preparing meals from scratch all ingredients are raw and unprocessed and in extreme cases grown at the home On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s These include food and appliance companies the restaurant industry the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't

Consider the Fork Bee Wilson, 2012-10-25 Bee Wilson is the food writer and historian who writes as the Kitchen Thinker in the Sunday Telegraph and is the author of *Swindled* Her charming and original new book *Consider the Fork* explores how the implements we use in the kitchen have shaped the way we cook and live A wooden spoon most trusted and loveable of kitchen implements looks like the opposite of technology as the word is normally understood But look closer Is it oval or round Does it have an extra long handle to give your hand a place of greater safety from a hot skillet Or a pointy bit at one side to get the lumpy bits in the corner of the pan It took countless inventions to get to the well equipped kitchens we have now where our old low tech spoon is joined by mixers freezers and microwaves but the story of human invention in the kitchen is largely unseen Discovering the histories of our knives ovens and kitchens themselves Bee Wilson explores among many other things why the French and Chinese have such different cultures of the knife and why Roman kitchens contain so many implements we recognize Encompassing inventors scientists cooks and chefs
