practice to a state ritual at best or at worst considering it a barbaric exercise not befitting of the royal family While kings defied the narrow Confucian views on governance that elevated book learning over martial skills these tensions revealed how the meaning of political power and authority were shaped Attention to animals and hunting depicts how a multiplicity of cultural references Sinic Korean Northeast Asian and steppeland existed in tension with each other and served as a battleground for defining politics society and ritual Kallander argues that rather than mere resources animals were a site over which power struggles were waged
