The Land Of Froud:

The Land of Froud Brian Froud, 1977-01-01 The Works of the British Poets Robert Anderson, 1795 Climate-change Mitigation and European Land-use Policies W. Neil Adger, Davide Pettenella, Martin Charles Whitby, 1997 The UN Convention on Climate Change requires countries to reduce their polluting greenhouse gas emissions from all sources including agriculture forestry and land use Emissions associated with land use are inherent in modern farming and forestry practices with the commitments under the Convention representing a clear challenge to restructuring of Europe's agriculture and forestry policies This book primarily considers the actions of Europe and other regions in reducing land use related greenhouse gas fluxes while recognising that the array of economic and political pressures for CAP reform and sustainable land use are fundamentally intertwined The book is aimed at practitioners academics and policy makers in the field of agriculture and forestry who wish to understand the importance of the global emissions issue for European and global land use Individual contributors from 10 countries consider greenhouse gas emissions at the sub national national EU and global scales Efficiency equity and implications of policy in this area are the primary focus of the volume *Land Title Origins* Alfred Noblit Chandler, 1979 **Sir Gregor MacGregor and the Land that Never was** David Sinclair, 2003 On a cold January morning in 1823 a group of Scottish immigrants set sail from the port of Leith They were headed for the nation of Poyais in Central America where they were told they would find rich and fertile soils a balmy climate and beautiful civilized cities A month later they landed on the swamp infested Mosquito Coast and were forced to realize that they had been the victims of one of the most elaborate hoaxes in history The land they had been sold was non-existent the banknotes and guidebooks they carried with them were forgeries their documents were worthless Poyais was a fiction The Land That Never Was David Sinclair, 2004-01-07 On a cold January morning in 1823 a group of Scottish immigrants looking for a new life set sail for a tropical Eden called Poyais The only catch was that it didn't exist This is the dazzling and very funny story of one of the greatest hoaxes in history a story as colorful and bizarre as the mastermind behind it **The Lure of the Land** Everett Newfon Dick, 1970 The process of transfer to private ownership of government land or government supervised Indian land was the woof thread on the loom of the frontier the author writes in his preface This thread was continually interlaced with hard experiences in the struggle for existence thus weaving the fabric of the social and economic history of the American frontier My aim in this book is to trace this thread from government ownership of the land into private hands Although Thomas Jefferson reckoned that the march of population from the Appalachians to the Pacific would take one hundred generations by 1935 the western wilderness created by law in the 1780s as the unreserved and unappropriated public domain had all but vanished It is the human side of this process of land distribution that Professor Dick examines how the land hungry pioneer interpreted the land laws or ignored them his success in handing up laws to Congress by frontier usage when existing statutes were inadequate for his needs his custom of illegally exploiting the natural resources and the

final end of exploitation and the coming of a policy of conservation After a brief discussion of colonial land policies and the formation of the public domain in the post Revolutionary period the author describes the adoption of the surveying system the actual work of the surveyors and how the land was distributed to settlers There follow chapters on the squatter the use of land by lumbering interests the struggle for pre emptio the campaign of the West for free land and the passage of the Homestead Act the problems which accompanied the acquisition of land from foreign governments the occupation and exploitation of the mineral lands the occupation and use of the grasslands with a discussion of the range wars land given for internal improvements such as railroads the openings of Indian reservations with their land rushes or drawings the final occupancy of the dry land for use by dry land farming or irrigation and finally the coming of conservation and the establishment of the permanent public domain in the form of national forests and grazing land Professor Dick s work goes beyond present books on land in the realm of human interest for it deals with the people themselves not with acts of Congress or legal decisions It also goes deeper than previously published works into such areas as the development of claim clubs squatting and the holding of public land by individuals for extended use or speculation while waiting to sell at an advance over the government price Dust jacket

The Fraud Test and 'Manifest Injustice' Under the New Land Transfer Act Neil Campbell,Rod Thomas,2019 Perhaps two of the most significant changes in the Land Transfer 2007 Act NZ are the introduction of a statutory definition of land transfer fraud together with a provision allowing registration to be overturned on grounds other than a finding of fraud by the new registered proprietor This is where the registration result is considered to be manifestly unjust The statutory definition of the fraud test is considered to be cumbersome unsatisfactory and indeed badly drafted indicating perhaps the inadvisability of incorporating a statutory definition of this construct in the legislation The manifest injustice test is equally considered to be problematic It allows the Torrens registered result to be overturned on the general grounds that the registered result is manifestly unjust This determination cannot be made without a court hearing with relevant factual findings being made by the court that relate to the effect of the transaction under consideration on affected parties including holders of unregistered interests By application of such a test the land can be returned notwithstanding the absence of any finding of fault fraud or improper dealing by the new title registrant Indeed the relevant grounds suggests a statutory bias in favour of returning land Furthermore the hapless new registrant will have to bear their own litigation costs in defending their registered status even though they are not a wrongdoer This is because that party is only entitled to compensation from the State if the title registration is overturned This raises the issue of whether we still have an immediate indefeasibility system or indeed even a State guarantee as the registered result The reform of the land laws John Davy (land law reformer.),1886 **The Torrens System. Indefeasibility and the Fraud Exception** Bill Sarwari,2013-09-18 Essay from the year 2012 in the subject Law Civil Private Law of Obligation Property Law grade 97% High Distinction course Master of Business Law language English abstract Indefeasibility in its pure form is a simple concept In essence the name of a registered proprietor on the land register is conclusive proof of legal ownership of land In practice however the concept is far from simple This paper critically explores the concept of indefeasibility by comparing the Torrens system of title by

registration with that which went before title by deed In doing so this paper clearly sets out the objectives of the Torrens system The exploration then goes on to an examination of a particular qualification to indefeasibility in the shape of the fraud exception and finally suggests some improvements that could be made to the doctrine *The Land Laws of Canada and the Land Experience of the United States (Classic Reprint)* Ditlew Monrad Frederiksen, 2019-02-05 Excerpt from The Land Laws of Canada and the Land Experience of the United States In fact the recent law authorizing homesteads of 640 acres in Nebraska is an admission of the fact that for something like forty years this State was laboring under a 160 acre law which was in no sense calculated to develop the natural ranching and cattle raising resources of the country The rule of course is that where ill adapted laws have been in effect people have managed to get around them by fraud but the result has frequently been not merely fraud and perjury but also violence and murder Witness the battles between cow men and sheep men for the right to the grass on Government land The Government land even now is frequently unlawfully fenced in President Roosevelt is said recently to have complimented a certain rancher on the area of his fine ranch without knowing that in fact most of the land was Govern ment land held by the rancher in absolute contravention of law In his recent 1907 message President Roosevelt himself refers to this condition as follows About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
