Language and Sexuality (through and) beyond Gender Costas Canakis, Venetia Kantsa, Kostas Yiannakopoulos, 2010-04-16

This volume is a collection of papers on aspects of language and sexuality as understood and problematized by scholars in linguistics and anthropology. The idea behind this volume was to bring together people working on language and sexuality issues from within these two fields given that linguistic research on this topic is more often than not fieldwork related and anthropological research characteristically focuses on issues of sexual onomasiology and semasiology, a concomitant of its preoccupation with social categories and categorization. This endeavor is in many respects a continuation of the discussion on the social constitution of gender while following up on a slowly but steadily growing tradition of research on language and sexuality both in relation to gender and beyond it. Although gender and sexuality may be thought of as distinct in principle they interact not only in the framework provided by heteronormativity but also in contexts where their presupposed alignment is questioned if not summarily rebuked. Therefore if there is indeed something to be said about language and sexuality beyond gender any such discussion will also have to go through it. On the other hand work on gendered language will have to co-estimate the findings of research on language and sexuality. Contributors in this volume have assumed a variety of theoretical positions from which to tackle their diverse topics covering a wide range of sexually relevant language pertaining to heterosexual, lesbian, gay and queer experience but also to voice silence, the unconscious and nationalism. Issues of identities and desires inevitably take center stage in many of the papers reflecting dominant theoretical approaches and tensions in the field even as authors may remain skeptical of the usefulness of the ensuing polarizations. At the same time the polyphony envisioned by the editors and contributors in this volume will be operative in the ongoing critical appraisal of theoretical stances towards the intricate indexical relation between language, gender and sexuality. **Researching**

Language, Gender and Sexuality Helen Sauntson, 2019-11-25 **Researching Language Gender and Sexuality** leads students through the process of undertaking research in order to explore how gender and sexuality are represented and constructed through language. Drawing on international research, Sauntson incorporates a fluid understanding of genders and sexualities and includes research on a diverse range of identities. This accessible guidebook offers an outline of the practical steps and ethical guidelines involved when gathering linguistic data for the purpose of investigating gender and sexuality. Each chapter contains up-to-date information and empirical case studies that relate to a range of topics within the field of language, gender and sexuality as well as suggestions for how students could practically research the areas covered. Student-friendly, this is essential reading for undergraduate and postgraduate students of English language, linguistics and gender studies.

Language, Gender and Sexual Identity Heiko Motschenbacher, 2010 This book makes an innovative contribution to the relatively young field of Queer Linguistics. Subscribing to a poststructuralist framework it presents a critical deconstructionist perspective on the discursive construction of heteronormativity and gender binarism from a linguistic point of view. On the one hand the book provides an outline of Queer approaches to issues of language, gender and sexual identity.

that is of interest to students and scholars new to the field On the other hand the empirical analyses of language data represent material that also appeals to experts in the field The book deals with repercussions of the discursive materialisation of heteronormativity and gender binarism in various kinds of linguistic data These include stereotypical genderlects structural linguistic gender categories especially from a contrastive linguistic point of view the discursive sedimentation of female and feminine generics linguistic constructions of the gendered body in advertising and the usage of personal reference forms to create characters in Queer Cinema Throughout the book readers become aware of the wounding potential that gendered linguistic forms may possess in certain contexts

Language, Sexuality and Education Helen Sauntson, 2018-03-15 Presenting a range of data obtained from secondary schools in the UK and US this path breaking book explores the role played by language in constructing sexual identities Analysing the often complex ways in which homophobia heterosexism and heteronormativity are enacted within school contexts it shows that by analysing language we can discover much about how educators and students experience sexual diversity in their schools how sexual identities are constructed through language and how different statuses are ascribed to different sexual identities
